

Consolidated Set of the GRI Standards

Consolidated Set of the GRI Standards

This document contains the complete set of GRI Sustainability Reporting Standards (GRI Standards). It includes the most recent versions of the Standards available as of 30 June 2022. The full contents of each Standard have been incorporated, including the original formatting and page numbering, but the cover pages between the Standards have been left out.

Responsibility

This Standard is issued by the [Global Sustainability Standards Board \(GSSB\)](#). Any feedback on the GRI Standards can be submitted to gssbsecretariat@globalreporting.org for the consideration of the GSSB.

Due Process

This document was developed in the public interest and in accordance with the requirements of the GSSB Due Process Protocol. It has been developed using multi-stakeholder expertise, and with regard to authoritative intergovernmental instruments and widely held expectations of organizations relating to social, environmental, and economic responsibilities

Legal liability

This document, designed to promote sustainability reporting, has been developed by the Global Sustainability Standards Board (GSSB) through a unique multi-stakeholder consultative process involving representatives from organizations and report information users from around the world. While the GRI Supervisory Board, Management Board, and GSSB encourage the use of the GRI Sustainability Reporting Standards (GRI Standards) and related Interpretations by all organizations, the preparation and publication of reports based fully or partially on the GRI Standards and related Interpretations are the full responsibility of those producing them. Neither the GRI Supervisory Board, Management Board, GSSB, nor Stichting Global Reporting Initiative (GRI) can assume responsibility for any consequences or damages resulting directly or indirectly from the use of the GRI Standards and related Interpretations in the preparation of reports, or the use of reports based on the GRI Standards and related Interpretations.

Copyright and trademark notice

This document is copyright-protected by Stichting Global Reporting Initiative (GRI). The reproduction and distribution of this document for information and/or use in preparing a sustainability report is permitted without prior permission from GRI. However, neither this document nor any extract from it may be reproduced, stored, translated, or transferred in any form or by any means (electronic, mechanical, photocopied, recorded, or otherwise) for any other purpose without prior written permission from GRI.

Introduction

GRI 1: Foundation 2021 introduces the purpose and system of the GRI Sustainability Reporting Standards (GRI Standards) and explains key concepts for sustainability reporting. It also specifies the requirements and reporting principles that organizations must comply with to report in accordance with the GRI Standards. *GRI 1* is the first Standard that organizations should consult to understand how to report using the GRI Standards.

GRI 1 is structured as follows:

- [Section 1](#) introduces the purpose and the system of the GRI Standards.
- [Section 2](#) explains the key concepts that are used throughout the GRI Standards.
- [Section 3](#) specifies the requirements for reporting in accordance with the GRI Standards.
- [Section 4](#) specifies the reporting principles, which are fundamental to ensuring the quality of the reported information.
- [Section 5](#) presents recommendations for the organization to align its sustainability reporting with other types of reporting and to enhance the credibility of its sustainability reporting.
- The [Glossary](#) contains defined terms with a specific meaning when used in the GRI Standards. The terms are underlined in the text of the GRI Standards and linked to the definitions.
- The [Bibliography](#) lists authoritative intergovernmental instruments used in developing this Standard.
- The [Appendixes](#) provide guidance on how to prepare a GRI content index.

1. Purpose and system of GRI Standards

1.1 Purpose of the GRI Standards

Through their activities and business relationships, organizations can have an effect on the economy, environment, and people, and in turn make negative or positive contributions to sustainable development. Sustainable development refers to ‘development which meets the needs of the present without compromising the ability of future generations to meet their own needs’ [8]. The objective of sustainability reporting using the GRI Sustainability Reporting Standards (GRI Standards) is to provide transparency on how an organization contributes or aims to contribute to sustainable development.

The GRI Standards enable an organization to publicly disclose its most significant impacts on the economy, environment, and people, including impacts on their human rights and how the organization manages these impacts. This enhances transparency on the organization’s impacts and increases organizational accountability.

The Standards contain disclosures that allow an organization to report information about its impacts consistently and credibly. This enhances the global comparability and quality of reported information on these impacts, which supports information users in making informed assessments and decisions about the organization’s impacts and contribution to sustainable development.

The GRI Standards are based on expectations for responsible business conduct set out in authoritative intergovernmental instruments, such as the *Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises* [3] and the *United Nations (UN) Guiding Principles on Business and Human Rights* [5] (see the Bibliographies of the GRI Standards for a list of authoritative instruments used in developing the GRI Standards). Information reported using the GRI Standards can help users assess whether an organization meets the expectations set out in these instruments. It is important to note that the GRI Standards do not set allocations, thresholds, goals, targets, or any other benchmarks for good or bad performance.

1.2 Users

Any organization can use the GRI Standards – regardless of size, type, geographic location, or reporting experience – to report information about its impacts on the economy, environment, and people, including impacts on their human rights.

The reported information can be used by the organization in its decision-making, for example, when setting goals and targets, or when assessing and implementing its policies and practices.

Stakeholders and other information users can use the GRI Standards to understand what organizations are expected

to report about. Stakeholders can also use an organization's reported information to assess how they are affected or how they could be affected by the organization's activities.

Investors, in particular, can use the reported information to assess an organization's impacts and how it integrates sustainable development in its business strategy and model. They can also use this information to identify financial risks and opportunities related to the organization's impacts and to assess its long-term success. Users other than the organization's stakeholders, such as academics and analysts, can also use the reported information for purposes such as research or benchmarking.

The term 'information users' in the GRI Standards refers to all these diverse users of the organization's reported information.

1.3 System of GRI Standards

The GRI Standards are structured as a system of interrelated standards that are organized into three series: GRI Universal Standards, GRI Sector Standards, and GRI Topic Standards (see [Figure 1](#) in this Standard). The Universal Standards are used by all organizations when reporting in accordance with the GRI Standards. Organizations use the Sector Standards according to the sectors in which they operate, and the Topic Standards according to their list of material topics.

Universal Standards: GRI 1, GRI 2 and GRI 3

An organization begins by consulting *GRI 1: Foundation 2021*. *GRI 1* introduces the purpose and system of GRI Standards and explains key concepts for sustainability reporting. It also specifies the requirements and reporting principles that the organization must comply with to report in accordance with the GRI Standards.

GRI 2: General Disclosures 2021 contains disclosures that the organization uses to provide information about its reporting practices and other organizational details, such as its activities, governance, and policies. This information gives insight into the profile and scale of the organization and provides a context for understanding the organization's impacts.

GRI 3: Material Topics 2021 provides step-by-step guidance on how to determine material topics. *GRI 3* also contains disclosures that the organization uses to report information about its process of determining material topics, its list of material topics, and how it manages each topic.

Sector Standards

The Sector Standards provide information for organizations about their likely material topics. The organization uses the Sector Standards that apply to its sectors when determining its material topics, and when determining what information to report for the material topics.

Topic Standards

The Topic Standards contain disclosures for the organization to report information about its impacts in relation to particular topics. The Topic Standards cover a wide range of topics. The organization uses the Topic Standards according to the list of material topics it has determined using *GRI 3*.

Figure 1. GRI Standards: Universal, Sector and Topic Standards

1.4 Using the GRI Standards

All disclosures in the GRI Standards contain requirements. The requirements list information that an organization must report or provide instructions that the organization must comply with to report in accordance with the GRI Standards.

If the organization cannot comply with a disclosure or with a requirement in a disclosure for which reasons for omission are permitted (e.g., because the required information is confidential or subject to legal prohibitions), then the organization is required to specify the disclosure or the requirement it cannot comply with, and provide a reason for omission with an explanation in the GRI content index. See [Requirement 6](#) in this Standard for more information on reasons for omission.

If the organization cannot report the required information about an item specified in a disclosure because the item (e.g., committee, policy, practice, process) does not exist, it can comply with the requirement by reporting this to be the case. The organization can explain the reasons for not having this item or describe any plans to develop it. The disclosure does not require the organization to implement the item (e.g., developing a policy), but it is required to report that the item does not exist.

Requirements, guidance and defined terms

The following apply throughout the GRI Standards:

Requirements are presented in **bold font** and indicated by the word 'shall'. An organization must comply with requirements to report in accordance with the GRI Standards.

Requirements may be accompanied by guidance.

Guidance includes background information, explanations, and examples to help the organization better understand the requirements. The organization is not required to comply with guidance.

The Standards may also include recommendations. These are cases where a particular course of action is encouraged but not required.

The word 'should' indicates a recommendation, and the word 'can' indicates a possibility or option.

Defined terms are underlined in the text of the GRI Standards and linked to their definitions in the [Glossary](#). The organization is required to apply the definitions in the Glossary.

Reporting format

In the GRI Standards, the term 'sustainability reporting' refers to the process of reporting, which starts with an organization determining its material topics based on its most significant impacts and results in the organization publicly reporting information about these impacts.

The organization can publish or make information accessible in a range of formats (e.g., electronic, paper-based) across one or more locations (e.g., a standalone sustainability report, web pages, an annual report). The terms 'report' and 'reported information' in the GRI Standards both refer to information reported across all locations.

The GRI content index provides an overview of the organization's reported information and shows the location where information users can find it. The content index also shows which GRI Standards and disclosures the organization has used.

If the organization intends to publish a standalone sustainability report, it does not need to repeat information that it has already reported publicly elsewhere, such as on web pages or in its annual report. In such a case, the organization can report a required disclosure by providing a reference in the GRI content index as to where this information can be found (e.g., by providing a link to the web page or citing the page in the annual report where the information has been published).

Effective date

All GRI Standards have an effective date. This is the date from when the information published by an organization must make use of a particular GRI Standard. All information published after the effective date of a Standard must make use of that Standard.

For example, *GRI 1: Foundation 2021* has an effective date of 1 January 2023. This means that the organization must make use of *GRI 1* for the information it publishes on or after 1 January 2023.

Effective dates are set keeping in mind that organizations may need time to adopt a new or revised Standard. Adoption of a Standard before its effective date is encouraged, as this allows the organization to report according to best practice.

2. Key concepts

This section explains the concepts that lay the foundation for sustainability reporting. Understanding how these concepts are applied in the GRI Standards is essential for those who collect and prepare information for reporting and those who interpret information that is reported using the Standards.

The key concepts covered in this section are: impact, material topics, due diligence, and stakeholder. The purpose of the Standards is to enable organizations to report information about their most significant impacts on the economy, environment, and people, including impacts on their human rights – in the GRI Standards these are referred to as material topics. Due diligence and stakeholder engagement help organizations identify their most significant impacts.

2.1 Impact

In the GRI Standards, impact refers to the effect an organization has or could have on the economy, environment, and people, including effects on their human rights, as a result of the organization's activities or business relationships. The impacts can be actual or potential, negative or positive, short-term or long-term, intended or unintended, and reversible or irreversible. These impacts indicate the organization's contribution, negative or positive, to sustainable development.

The organization's impacts on the economy refer to the impacts on economic systems at local, national, and global levels. An organization can have an impact on the economy through, for example, its competition practices, its procurement practices, and its taxes and payments to governments.

The organization's impacts on the environment refer to the impacts on living organisms and non-living elements, including air, land, water, and ecosystems. An organization can have an impact on the environment through, for example, its use of energy, land, water, and other natural resources.

The organization's impacts on people refer to the impacts on individuals and groups, such as communities, vulnerable groups, or society. This includes the impacts the organization has on people's human rights. An organization can have an impact on people through, for example, its employment practices (e.g., the wages it pays to employees), its supply chain (e.g., the working conditions of workers of suppliers), and its products and services (e.g., their safety or accessibility). Individuals or groups that have interests that are affected or could be affected by the organization's activities are referred to as stakeholders (see [section 2.4](#) in this Standard for more information).

The impacts on the economy, environment, and people are interrelated. For example, an organization's impacts on the economy and environment can result in impacts on people and their human rights. Similarly, an organization's positive impacts can result in negative impacts and vice versa. For example, an organization's positive impacts on the environment can lead to negative impacts on people and their human rights.

2.2 Material topics

An organization may identify many impacts on which to report. When using the GRI Standards, the organization prioritizes reporting on those topics that represent its most significant impacts on the economy, environment, and people, including impacts on their human rights. In the GRI Standards, these are the organization's material topics.

Examples of material topics are anti-corruption, occupational health and safety, or water and effluents. A topic need not be limited to impacts on the economy, the environment, or people; it can cover impacts across all three dimensions. For example, an organization might determine that 'water and effluents' is a material topic based on the impacts its water use has on ecosystems and local communities' access to water. The GRI Standards group impacts into topics, like 'water and effluents', to help organizations report cohesively about multiple impacts that relate to the same topic.

The process of determining material topics is informed by the organization's ongoing identification and assessment of impacts. The ongoing identification and assessment of impacts involves engaging with relevant stakeholders and experts and it is conducted independently of the sustainability reporting process. See [section 1 in GRI 3: Material Topics 2021](#) for more information on determining material topics.

Box 1. Sustainability reporting and financial and value creation reporting

The GRI Standards enable organizations to report information about the most significant impacts of their activities and business relationships on the economy, environment, and people, including impacts on their human rights. Such impacts are of primary importance to sustainable development and to organizations' stakeholders, and they are the focus of sustainability reporting.

The impacts of an organization's activities and business relationships on the economy, environment, and people can have negative and positive consequences for the organization itself. These consequences can be operational or reputational, and therefore in many cases financial. For example, an organization's high use of non-renewable energy contributes to climate change and could, at the same time, result in increased operating costs for the organization due to legislation that seeks to shift energy use toward renewable sources.

Even if not financially material at the time of reporting, most, if not all, of the impacts of an organization's activities and business relationships on the economy, environment, and people will eventually become financially material issues. Therefore, the impacts are also important for those interested in the organization's financial performance and long-term success. Understanding these impacts is a necessary first step in determining related financially material issues for the organization.

Sustainability reporting is therefore crucial for financial and value creation reporting. Information made available through sustainability reporting provides input for identifying financial risks and opportunities related to the organization's impacts and for financial valuation. This, in turn, helps to make financial materiality judgments about what to recognize in financial statements.

While the impacts of the organization's activities and business relationships on the economy, environment, and people may become financially material, sustainability reporting is also highly relevant in its own right as a public interest activity. Sustainability reporting is independent of the consideration of financial implications. It is therefore important for the organization to report on all the material topics that it has determined using the GRI Standards. These material topics cannot be deprioritized on the basis of not being considered financially material by the organization.

2.3 Due diligence

In the GRI Standards, due diligence refers to the process through which an organization identifies, prevents, mitigates, and accounts for how it addresses its actual and potential negative impacts on the economy, environment, and people, including impacts on their human rights. The organization should address potential negative impacts through prevention or mitigation. It should address actual negative impacts through remediation in cases where the organization identifies it has caused or contributed to those impacts.

The way the organization is involved with negative impacts (i.e., whether it causes or contributes to the impacts, or whether the impacts are directly linked by its business relationships) determines how the organization should address the impacts. It also determines whether the organization has a responsibility to provide for or cooperate in the remediation of the impacts. The organization should:

- avoid causing or contributing to negative impacts through its own activities, and address such impacts when they occur by providing for or cooperating in their remediation through legitimate processes;
- in the case of negative impacts that are directly linked to the organization's operations, products, or services by its business relationships, seek to prevent or mitigate these impacts even if it has not contributed to them. The organization is not responsible for providing for or cooperating in the remediation of these impacts, but it can play a role in doing so.

If it is not feasible to address all identified impacts on the economy, environment, and people at once, the organization should prioritize the order in which to address potential negative impacts based on their severity and likelihood. In the case of potential negative human rights impacts, the severity of the impact takes precedence over its likelihood. See [section 1 in GRI 3: Material Topics 2021](#) for more information.

Due diligence is elaborated by the *United Nations (UN) Guiding Principles on Business and Human Rights* [5], the *Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises* [3], and the *OECD Due Diligence Guidance for Responsible Business Conduct* [2].

2.4 Stakeholder

Stakeholders are individuals or groups that have interests that are affected or could be affected by an organization's activities. Common categories of stakeholders for organizations are business partners, civil society organizations, consumers, customers, employees and other workers, governments, local communities, non-governmental organizations, shareholders and other investors, suppliers, trade unions, and vulnerable groups.

In the GRI Standards, an interest (or 'stake') is something of value to an individual or group, which can be affected by the activities of an organization. Stakeholders can have more than one interest. Not all interests are of equal importance and they do not all need to be treated equally. Human rights have a particular status as an entitlement of all people under international law. The most acute impacts the organization can have on people are those that negatively affect their human rights. The term 'rightsholders' refers to stakeholders whose individual human rights or collective rights (held by groups such as indigenous peoples) are or could be affected.

Stakeholder interests can be negatively or positively affected by the organization's activities. Due diligence focuses on identifying stakeholder interests that are or could be negatively affected by the organization's activities.

Stakeholders may not always have a direct relationship with the organization. For example, the workers in the organization's supply chain can also be its stakeholders, or there can be individuals or groups living at a distance from the organization's operations who can be affected or potentially affected by these operations. They may not be aware that they are stakeholders of that particular organization, especially if they have not yet been affected by its activities. The organization should identify the interests of these and other stakeholders who are unable to articulate their views (e.g., future generations).

Engaging with stakeholders helps the organization identify and manage its negative and positive impacts. Not all stakeholders will be affected by all activities of the organization. The organization should identify the stakeholders whose interests have to be taken into account in connection with a specific activity (i.e., 'relevant stakeholders').

Where it is impossible to engage with all relevant stakeholders directly, the organization can engage with credible stakeholder representatives or proxy organizations (e.g., non-governmental organizations, trade unions).

In addition to engaging with stakeholders, the organization can consult with experts in specific issues or contexts (e.g., academics, non-governmental organizations) for advice on identifying and managing its impacts.

Sometimes it is necessary to distinguish between stakeholders whose interests have been affected (i.e., 'affected stakeholders'), and those whose interests have not yet been affected but could potentially be affected (i.e., 'potentially affected stakeholders'). This distinction is important in due diligence. For example, if an organization's activity leads to a safety hazard, workers who are injured because of the hazard are affected stakeholders, and workers who have not yet been injured but who are exposed to the hazard and could be injured are potentially affected stakeholders. The distinction between affected and potentially affected stakeholders helps identify which workers should receive remedy.

See reference [2] in the [Bibliography](#).

3. Reporting in accordance with the GRI Standards

Reporting in accordance with the GRI Standards enables an organization to provide a comprehensive picture of its most significant impacts on the economy, environment, and people, including impacts on their human rights, and how it manages these impacts. This allows information users to make informed assessments and decisions about the organization's impacts and its contribution to sustainable development.

The organization must comply with all nine requirements in this section to report in accordance with the GRI Standards.

Overview of in accordance requirements

Requirement 1:	Apply the reporting principles
Requirement 2:	Report the disclosures in GRI 2: General Disclosures 2021
Requirement 3:	Determine material topics
Requirement 4:	Report the disclosures in GRI 3: Material Topics 2021
Requirement 5:	Report disclosures from the GRI Topic Standards for each material topic
Requirement 6:	Provide reasons for omission for disclosures and requirements that the organization cannot comply with
Requirement 7:	Publish a GRI content index
Requirement 8:	Provide a statement of use
Requirement 9:	Notify GRI

If the organization does not comply with all nine requirements, it cannot claim that it has prepared the reported information in accordance with the GRI Standards. In such a case, the organization may be able to claim that it has prepared the reported information with reference to the GRI Standards, provided it complies with the requirements specified in '[Reporting with reference to the GRI Standards](#)' at the end of this section.

Requirement 1: Apply the reporting principles

- a. The organization shall apply all the reporting principles specified in [section 4 of GRI 1: Foundation 2021](#).

Requirement 2: Report the disclosures in GRI 2: General Disclosures 2021

- a. The organization shall report all disclosures in [GRI 2: General Disclosures 2021](#).

Guidance

Reasons for omission are permitted for all disclosures in [GRI 2](#) except for:

- Disclosure 2-1 Organizational details
- Disclosure 2-2 Entities included in the organization's sustainability reporting
- Disclosure 2-3 Reporting period, frequency and contact point
- Disclosure 2-4 Restatements of information
- Disclosure 2-5 External assurance

If the organization cannot comply with a disclosure or with a requirement in a disclosure for which reasons for omission are permitted, then the organization is required to specify in the GRI content index the disclosure or the requirement it cannot comply with, and provide a reason for omission with an explanation. See [Requirement 6](#) in this Standard for more information on reasons for omission.

Requirement 3: Determine material topics

The organization shall:

- a. determine its material topics;
- b. review the GRI Sector Standard(s) that apply to its sector(s) and:
 - i. determine whether each topic in the applicable Sector Standard(s) is a material topic for the organization;
 - ii. list in the GRI content index any topics from the applicable Sector Standard(s) that the organization has determined as not material and explain why they are not material.

Guidance

See [section 1 in GRI 3: Material Topics 2021](#) for guidance on how to determine material topics.

The organization is required to determine its material topics based on its specific circumstances.

Using the GRI Sector Standards supports the organization in this process. The Sector Standards provide information for organizations about their likely material topics.

The organization is required to use the applicable Sector Standards when determining its material topics.

Guidance to 3-b

The organization is required to comply with Requirement 3-b only if GRI Sector Standards that apply to its sectors are available.

The organization is required to review each topic described in the applicable Sector Standards and determine whether it is a material topic for the organization. If the organization has determined any of the topics included in the applicable Sector Standards as not material, then the organization is required to list them in the GRI content index and explain why they are not material. See [Requirement 7](#) in this Standard for more information on the content index.

See [section 1 in GRI 3](#) and the GRI Sector Standards for guidance on how to use the Sector Standards to determine material topics.

Requirement 4: Report the disclosures in GRI 3: Material Topics 2021

The organization shall:

- a. report its process of determining material topics using [Disclosure 3-1](#);
- b. report a list of its material topics using [Disclosure 3-2](#);
- c. report how it manages each material topic using [Disclosure 3-3](#).

Guidance

Reasons for omission are only permitted for [Disclosure 3-3 Management of material topics in GRI 3](#).

If the organization cannot comply with Disclosure 3-3 or with a requirement in Disclosure 3-3, then the organization is required to specify this in the GRI content index, and to provide a reason for omission with an explanation. See [Requirement 6](#) in this Standard for more information on reasons for omission.

Requirement 5: Report disclosures from the GRI Topic Standards for each material topic

The organization shall:

- a. report disclosures from the GRI Topic Standards for each material topic;
- b. for each material topic covered in the applicable GRI Sector Standard(s), either:
 - i. report the disclosures from the GRI Topic Standards listed for that topic in the Sector Standard(s), or;
 - ii. provide the 'not applicable' reason for omission and the required explanation in the GRI content index.

Guidance to 5-a

For each material topic, the organization needs to identify disclosures from the GRI Topic Standards to report. The organization is required to report only those disclosures relevant to its impacts in relation to a material topic. The organization is not required to report disclosures that are not relevant.

There is no requirement for a minimum number of disclosures to report from the Topic Standards. The number of disclosures that the organization reports is based on its assessment of which disclosures are relevant to its impacts in relation to a material topic.

The organization may need to use more than one Topic Standard to report on a material topic. In addition, not all disclosures in a Topic Standard may be relevant for the organization to report. For example, an organization identifies pay equality as a material topic. The organization determines that the following disclosures are relevant to report on the topic: [Disclosure 202-1 Ratios of standard entry level wage by gender compared to local minimum wage in GRI 202: Market Presence 2016](#), and [Disclosure 405-2 Ratio of basic salary and remuneration of women to men in GRI 405: Diversity and Equal Opportunity 2016](#). The organization is not required to report other disclosures from these Standards (e.g., [Disclosure 202-2 Proportion of senior management hired from the local community in GRI 202](#)), as these disclosures do not address the topic of pay equality.

When a material topic is covered in the applicable GRI Sector Standards, the organization uses the Sector Standards to identify disclosures to report. See [Requirement 5-b](#) in this Standard for more information.

Reasons for omission are permitted for all disclosures from the Topic Standards. If the organization cannot comply with a disclosure or with a requirement in a disclosure, then the organization is required to specify in the GRI content index the disclosure or the requirement it cannot comply with, and provide a reason for omission with an explanation. See [Requirement 6](#) in this Standard for more information on reasons for omission.

The organization should provide sufficient information about its impacts in relation to each material topic so that information users can make informed assessments and decisions about the organization. If the disclosures from the Topic Standards do not provide sufficient information about the organization's impacts, then the organization should report additional disclosures. These can include the additional sector disclosures recommended in the GRI Sector Standards, disclosures from other sources, or disclosures developed by the organization itself.

Disclosures that the organization reports from other sources or that are developed by the organization itself, should have the same rigor as disclosures from the GRI Standards, and they should align with expectations set out in authoritative intergovernmental instruments.

Reporting on material topics not covered in the GRI Topic Standards

When the organization's material topic is not covered by the disclosures in the GRI Topic Standards, the organization is required to report how it manages the material topic, using [Disclosure 3-3 in GRI 3: Material Topics 2021](#). See [Requirement 4-c](#) in this Standard for more information.

In addition to reporting Disclosure 3-3, the organization should report other disclosures for that topic. These can include the additional sector disclosures recommended in the GRI Sector Standards, disclosures from other sources, or disclosures developed by the organization itself.

For example, an organization determines freedom of speech to be a material topic. As there is no Topic Standard that covers this topic, the organization should report disclosures from other sources or develop its own disclosures to report on the topic. The organization is still required to report how it manages the topic of freedom of speech, using [Disclosure 3-3 in GRI 3](#).

Guidance to 5-b

The organization is required to comply with Requirement 5-b only if GRI Sector Standards that apply to its sectors are available. The Sector Standards provide information for organizations about their likely material topics.

The organization is required to review each topic described in the applicable Sector Standards and determine whether it is a material topic for the organization.

If the organization determines a topic in an applicable Sector Standard to be material, the Sector Standard helps the organization identify disclosures to report information about its impacts in relation to that topic. For each likely material topic, the Sector Standards list disclosures from the GRI Topic Standards for organizations to report. If any of the Topic Standards disclosures listed in the Sector Standards are not relevant to the organization's impacts, the organization is not required to report these. However, the organization is required to list these disclosures in the GRI content index and provide 'not applicable' as the reason for omission for not reporting the disclosures. The organization is also required to explain in brief why the disclosures are not relevant to its impacts in relation to the material topic. See

Requirement 6 in this Standard for more information on reasons for omission.

Note that when reporting the Topic Standards disclosures listed in the Sector Standards, the organization can still use any of the four reasons for omission included in [Table 1](#) of this Standard if it cannot comply with the disclosure or with a requirement in the disclosure.

Besides the disclosures from the Topic Standards, the Sector Standards may list additional sector disclosures for organizations to report. Reporting these additional sector disclosures is a recommendation. The organization is not required to provide a reason for omission for the additional sector disclosures it does not report.

Requirement 6: Provide reasons for omission for disclosures and requirements that the organization cannot comply with

- a. If the organization cannot comply with a disclosure or with a requirement in a disclosure for which reasons for omission are permitted, the organization shall in the GRI content index:
- specify the disclosure or the requirement it cannot comply with;
 - provide one of the four reasons for omission included in [Table 1](#) and the required explanation for that reason.

Table 1. Permitted reasons for omission and required explanations

REASON FOR OMISSION	REQUIRED EXPLANATION
Not applicable	Explain why the disclosure or the requirement is considered not applicable.
Legal prohibitions	Describe the specific legal prohibitions.
Confidentiality constraints	Describe the specific confidentiality constraints.
Information unavailable / incomplete	Specify which information is unavailable or incomplete. When the information is incomplete, specify which part is missing (e.g., specify the entities for which the information is missing). Explain why the required information is unavailable or incomplete. Describe the steps being taken and the expected time frame to obtain the information.

Guidance

Reasons for omission are permitted for all disclosures from the GRI Standards except for:

- Disclosure 2-1 Organizational details
- Disclosure 2-2 Entities included in the organization's sustainability reporting
- Disclosure 2-3 Reporting period, frequency and contact point
- Disclosure 2-4 Restatements of information
- Disclosure 2-5 External assurance
- Disclosure 3-1 Process to determine material topics
- Disclosure 3-2 List of material topics

The organization is only permitted to provide one of the four reasons for omission included in [Table 1](#) of this Standard:

Not applicable

The organization provides 'not applicable' as the reason for omission in the following situations:

- When a disclosure or a requirement in a disclosure does not apply to the organization based on its characteristics (e.g., size, type). For example, [2-15-b-iii in GRI 2: General Disclosures 2021](#) requires the organization to report whether conflicts of interest relating to the existence of controlling shareholders are disclosed to stakeholders. This requirement does not apply to organizations that do not have shareholders (e.g., foundations).

In such cases, the organization is required to explain why the disclosure or the requirement does not apply to the organization.

However, there may be cases where a disclosure or a requirement in a disclosure applies to the organization, but

the organization does not have in place the item specified in the disclosure or in the requirement (e.g., committee, policy, practice, process). For example, [2-23-b in GRI 2](#) requires the organization to describe its policy commitment to respect human rights. This expectation applies to every organization. All organizations are expected to have a policy commitment to respect human rights, but not every organization may have developed such a policy commitment yet.

If the organization cannot report the required information about an item specified in a disclosure because the item (e.g., committee, policy, practice, process) does not exist, it can comply with the requirement by reporting this to be the case. It does not need to provide the 'not applicable' reason for omission.

In such cases, the organization can explain the reasons for not having this item or describe any plans to develop it. The disclosure does not require the organization to implement the item (e.g., developing a policy), but to report that the item does not exist.

- When a disclosure from the GRI Topic Standards that is listed in the applicable GRI Sector Standards is not relevant to the organization's impacts in relation to a material topic. In such cases, the organization is required to explain why the disclosure is not relevant to its impacts in relation to the material topic.

Legal prohibitions

The organization provides 'legal prohibitions' as the reason for omission when the law forbids collecting the required information or reporting it publicly.

Confidentiality constraints

There may be cases where the law does not forbid collecting or reporting the required information, but the organization considers the information confidential and cannot report it publicly. In such cases, the organization provides 'confidentiality constraints' as the reason for omission.

Information unavailable / incomplete

There may be cases where the organization has the item specified in a disclosure or in a requirement in a disclosure, but the information about the item is unavailable or incomplete. In such cases, the organization provides 'information unavailable / incomplete' as the reason for omission. For example, information is unavailable for [Disclosure 305-3 in GRI 305: Emissions 2016](#) when the organization has other indirect (Scope 3) greenhouse gas (GHG) emissions, but it has not collected data on its other indirect (Scope 3) GHG emissions yet.

When the organization cannot report part of the required information it means the information is incomplete. When the reported information does not cover the complete scope required by a disclosure (e.g., the information is missing for certain entities, sites, geographic locations), then the organization is required to provide 'information unavailable / incomplete' as the reason for omission. The organization must specify the entities, sites, geographic locations, etc., for which the required information is missing and cannot be reported.

The required information, or part of the required information, can be unavailable when, for example, it cannot be obtained or is not of adequate quality to report. This may be the case when the information is collected from another organization, such as a supplier.

The reasons 'confidentiality constraints' and 'information unavailable / incomplete' should only be used in exceptional cases. Using 'confidentiality constraints' and 'information unavailable / incomplete' frequently as reasons for omitting information reduces the credibility and usefulness of the organization's sustainability reporting. It does not align with the aim of reporting in accordance with the GRI Standards, which is to provide a comprehensive picture of the organization's most significant impacts.

The organization is not allowed to use other reasons for omission than those included in [Table 1](#) of this Standard.

The organization is required to report reasons for omission in the GRI content index. See [Requirement 7](#) in this Standard for more information on the content index.

Requirement 7: Publish a GRI content index

The organization shall:

- a. publish a GRI content index that includes:
 - i. the title: GRI content index;
 - ii. the statement of use;
 - iii. the title of GRI 1 used;

- iv. the title(s) of the GRI Sector Standard(s) that apply to the organization's sector(s);
 - v. a list of the organization's material topics;
 - vi. a list of the topics in the applicable GRI Sector Standard(s) determined as not material and an explanation for why they are not material;
 - vii. a list of the reported disclosures, including the disclosure titles;
 - viii. the titles of the GRI Standards and other sources that the reported disclosures come from;
 - ix. when the organization does not report GRI Topic Standard disclosures for a material topic from the applicable GRI Sector Standard(s), a list of the disclosures and the required reason for omission;
 - x. the GRI Sector Standard reference numbers for the disclosures from the applicable Sector Standard(s);
 - xi. the location where the information reported for each disclosure can be found;
 - xii. any reasons for omission used;
- b. if it publishes a standalone sustainability report and the GRI content index is not included in the report itself, provide a link or reference to the GRI content index in the report.

Guidance

The information reported using the GRI Standards can be published or made accessible in a range of formats (e.g., electronic, paper-based) across one or more locations (e.g., a standalone sustainability report, web pages, an annual report). The GRI content index provides an overview of the organization's reported information, shows where the reported information can be found, and helps information users access this information. The content index also shows which GRI Standards and disclosures the organization has used.

[Appendix 1](#) of this Standard provides guidance on how to prepare the GRI content index when reporting in accordance with the GRI Standards. It includes an example that the organization can use to prepare the content index. The organization can use a different format for the content index than the one provided in Appendix 1, as long as it complies with the requirements for the content index.

Requirement 8: Provide a statement of use

- a. The organization shall include the following statement in its GRI content index:
[Name of organization] has reported in accordance with the GRI Standards for the period [reporting period start and end dates].

Guidance

To state that the organization has reported in accordance with the GRI Standards, the organization must have complied with all nine requirements in this section.

The organization is required to insert the name of the organization and the start and end dates of its reporting period in the statement, for example:

'ABC Limited has reported in accordance with the GRI Standards for the period from 1 January 2022 to 31 December 2022.'

The organization is required to report whether the highest governance body is responsible for reviewing and approving the reported information, including the organization's material topics, under [Disclosure 2-14 in GRI 2: General Disclosures 2021](#).

Requirement 9: Notify GRI

- a. The organization shall notify GRI of the use of the GRI Standards and the statement of use by sending an email to reportregistration@globalreporting.org.

Guidance

The organization should include the following information in the email:

- The legal name of the organization.
- The link to the GRI content index.
- The link to the report, if publishing a standalone sustainability report.
- The statement of use.
- A contact person in the organization and their contact details.

There is no cost associated with notifying GRI of the use of the GRI Standards.

Reporting with reference to the GRI Standards

An organization can report with reference to the GRI Standards if it cannot comply with all the requirements for reporting in accordance with the GRI Standards. The organization should transition to reporting in accordance with the GRI Standards in time as it will provide a comprehensive picture of the organization's most significant impacts on the economy, environment, and people, including impacts on their human rights.

The organization can also report with reference to the GRI Standards if it uses selected GRI Standards, or parts of their content, to report information about specific topics for specific purposes, such as complying with a reporting regulation on climate change.

The organization must comply with all three requirements in this section to report with reference to the GRI Standards. The organization should also apply the reporting principles specified in [section 4 of this Standard](#) to ensure high-quality reporting. Additionally, the organization should explain how it manages its impacts for the topics it reports on using [Disclosure 3-3 in GRI 3: Material Topics 2021](#).

Overview of requirements for reporting with reference to the GRI Standards

Publish a GRI content index
Provide a statement of use
Notify GRI

Publish a GRI content index

The organization shall:

- a. publish a GRI content index that includes:
 - i. the title: GRI content index;
 - ii. the statement of use;
 - iii. the title of GRI 1 used;
 - iv. a list of the reported disclosures from the GRI Standards, including the disclosure titles;
 - v. the titles of the GRI Standards that the reported disclosures come from;
 - vi. the location where the information reported for each disclosure can be found;
- b. if it publishes a standalone sustainability report and the GRI content index is not included in the report itself, provide a link or reference to the GRI content index in the report.

Guidance

The information reported using the GRI Standards can be published or made accessible in a range of formats (e.g., electronic, paper-based) across one or more locations (e.g., a standalone sustainability report, web pages, an annual report). The GRI content index provides an overview of the organization's reported information, shows where the reported information can be found, and helps information users access this information. The content index also shows which GRI Standards and disclosures the organization has used.

[Appendix 2](#) of this Standard provides guidance on how to prepare the GRI content index when reporting with reference to the GRI Standards. It includes an example that the organization can use to prepare the content index. The organization can use a different format for the content index than the one provided in [Appendix 2](#), as long as it complies with the requirements for the content index. The organization can also use the content index specified for reporting in accordance with the GRI Standards in [Appendix 1](#) of this Standard, if suitable. In such a case, the statement of use in [Appendix 1](#), which is for reporting in accordance with the GRI Standards, must be replaced by the statement of use for reporting with reference to the GRI Standards.

Provide a statement of use

- a. The organization shall include the following statement in its GRI content index:
[Name of organization] has reported the information cited in this GRI content index for the period [reporting period start and end dates] with reference to the GRI Standards.

Guidance

To state that the organization has reported with reference to the GRI Standards, the organization must have complied

with all three requirements in this section.

The organization is required to insert the name of the organization and the start and end dates of its reporting period in the statement, for example:

‘ABC Limited has reported the information cited in this GRI content index for the period from 1 January 2022 to 31 December 2022 with reference to the GRI Standards.’

Notify GRI

- a. **The organization shall notify GRI of the use of the GRI Standards and the statement of use by sending an email to reportregistration@globalreporting.org.**

Guidance

The organization should include the following information in the email:

- The legal name of the organization.
- The link to the GRI content index.
- The link to the report, if publishing a standalone sustainability report.
- The statement of use.
- A contact person in the organization and their contact details.

There is no cost associated with notifying GRI of the use of the GRI Standards.

4. Reporting principles

The reporting principles are fundamental to achieving high-quality sustainability reporting. Therefore, an organization is required to apply the reporting principles to be able to claim that it has prepared the reported information in accordance with the GRI Standards (see [section 3](#) in this Standard).

The reporting principles guide the organization in ensuring the quality and proper presentation of the reported information. High-quality information allows information users to make informed assessments and decisions about the organization's impacts and its contribution to sustainable development.

Each reporting principle consists of a requirement and guidance on how to apply it.

Overview of principles

- Accuracy
- Balance
- Clarity
- Comparability
- Completeness
- Sustainability context
- Timeliness
- Verifiability

Accuracy

Requirement

- a. **The organization shall report information that is correct and sufficiently detailed to allow an assessment of the organization's impacts.**

Guidance

The characteristics that determine accuracy vary depending on the nature of the information (qualitative or quantitative) and the intended use of the information. The accuracy of quantitative information depends on the specific methods used to gather, compile, and analyze data. The accuracy of qualitative information depends on the level of detail and consistency with the available evidence. Information users require sufficient detail to make assessments about the organization's impacts.

To apply the Accuracy principle, the organization should:

- report qualitative information that is consistent with available evidence and other reported information;
- indicate which data has been measured;
- adequately describe data measurements and bases for calculations, and ensure it is possible to replicate measurements and calculations with similar results;
- ensure that the margin of error for data measurements does not inappropriately influence the conclusions or assessments of information users;
- indicate which data has been estimated, and explain the underlying assumptions and techniques used for the estimation as well as any limitations of the estimates.

Balance

Requirement

- a. **The organization shall report information in an unbiased way and provide a fair representation of the organization's negative and positive impacts.**

Guidance

To apply the Balance principle, the organization should:

- present information in a way that allows information users to see negative and positive year-on-year trends in impacts;

- distinguish clearly between facts and the organization's interpretation of the facts;
- not omit relevant information concerning its negative impacts;
- not overemphasize positive news or impacts;
- not present information in a way that is likely to inappropriately influence the conclusions or assessments of information users.

Clarity

Requirement

- a. The organization shall present information in a way that is accessible and understandable.**

Guidance

To apply the Clarity principle, the organization should:

- consider specific accessibility needs of information users, associated with abilities, language, and technology;
- present information in a way that users can find the information they want without unreasonable effort, for example, through a table of contents, maps, or links;
- present information in a way that it can be understood by users who have reasonable knowledge of the organization and its activities;
- avoid abbreviations, technical terms, or other jargon likely to be unfamiliar to users or, if these are used, include relevant explanations in the appropriate sections or in a glossary;
- report information in a concise way and aggregate information where useful without omitting necessary details;
- use graphics and consolidated data tables to make information accessible and understandable.

Comparability

Requirement

- a. The organization shall select, compile, and report information consistently to enable an analysis of changes in the organization's impacts over time and an analysis of these impacts relative to those of other organizations.**

Guidance

Information reported in a comparable way enables the organization and other information users to assess the organization's current impacts against its past impacts and its goals and targets. It also enables external parties to assess and benchmark the organization's impacts against impacts of other organizations as part of rating activities, investment decisions, and advocacy programs.

To apply the Comparability principle, the organization should:

- present information for the current reporting period and at least two previous periods, as well as any goals and targets that have been set;
- use accepted international metrics (e.g., kilograms, liters), and standard conversion factors and protocols, where applicable, for compiling and reporting information;
- maintain consistency in the methods used to measure and calculate data and in explaining the methods and assumptions used;
- maintain consistency in the manner of presenting the information;
- report total numbers or absolute data (e.g., metric tons of CO₂ equivalent) as well as ratios or normalized data (e.g., CO₂ emissions per unit produced) to enable comparisons, and provide explanatory notes when using ratios;
- provide contextual information (e.g., the organization's size, geographic location) to help information users understand the factors that contribute to differences between the organization's impacts and the impacts of other organizations;
- present the current disclosures alongside restatements of historical data to enable comparisons if there have been changes from the information reported previously. This can include changes in the length of the reporting period, in the measurement methodologies, in the definitions used, or in other elements of reporting. The organization is required to report restatements of information under [Disclosure 2-4 in GRI 2: General Disclosures 2021](#);
- if restatements of historical data are not provided, explain the changes to provide contextual information for interpreting the current disclosures.

Completeness

Requirement

- a. The organization shall provide sufficient information to enable an assessment of the organization's impacts during the reporting period.**

Guidance

To apply the Completeness principle, the organization should:

- present activities, events, and impacts for the reporting period in which they occur. This includes reporting information about activities that have a minimal impact in the short-term, but a reasonably foreseeable cumulative impact that can become unavoidable or irreversible in the long-term (e.g., activities that generate bio-accumulative or persistent pollutants);
- not omit information that is necessary for understanding the organization's impacts.

If the organization consists of multiple entities (i.e., a parent entity and its subordinate entities), the organization is required to explain the approach used for consolidating the information under [2-2-c in GRI 2: General Disclosures 2021](#).

If the information for a disclosure or a requirement in a disclosure for which reasons for omission are permitted is unavailable or incomplete, then the organization is required to provide a reason for omission. When information is incomplete, the organization is required to specify which part is missing (e.g., specify the entities for which the information is missing). See [Requirement 6](#) in this Standard for more information.

Sustainability context

Requirement

- a. The organization shall report information about its impacts in the wider context of sustainable development.**

Guidance

Sustainable development has been defined as 'development which meets the needs of the present without compromising the ability of future generations to meet their own needs' [8]. The objective of sustainability reporting using the GRI Standards is to provide transparency on how an organization contributes or aims to contribute to sustainable development. For this purpose, the organization needs to assess and report information about its impacts in the wider context of sustainable development.

To apply the Sustainability context principle, the organization should:

- draw on objective information and authoritative measures on sustainable development to report information about its impacts (e.g., scientific research or consensus on the limits and demands placed on environmental resources);
- report information about its impacts in relation to sustainable development goals and conditions (e.g., reporting total greenhouse gas [GHG] emissions as well as reductions in GHG emissions in relation to the goals set out in the *United Nations [UN] Framework Convention on Climate Change [FCCC] Paris Agreement* [4]);
- report information about its impacts in relation to societal expectations and expectations of responsible business conduct set out in authoritative intergovernmental instruments with which the organization is expected to comply (e.g., *Organisation for Economic Co-operation and Development [OECD] Guidelines for Multinational Enterprises* [3], *UN Guiding Principles on Business and Human Rights* [5]) and in other recognized sector-specific, local, regional, or global instruments;
- if operating in a range of locations, report information about its impacts in relation to appropriate local contexts (e.g., reporting total water use, as well as water use relative to the sustainable thresholds and the social context of given catchments).

Understanding the sustainability context provides the organization with critical information to determine and report on its material topics (see [GRI 3: Material Topics 2021](#)). The GRI Sector Standards describe the sectors' context and can help the organization understand its sustainability context.

Timeliness

Requirement

- a. The organization shall report information on a regular schedule and make it available in time for information users to make decisions.**

Guidance

The usefulness of information is closely tied to whether it is available in time for information users to integrate it into their decision-making. Thus, the Timeliness principle refers to how regularly and how soon after the reporting period the information is published.

To apply the Timeliness principle, the organization should:

- find a balance between the need to make information available in a timely manner and ensuring that the information is of high quality and meets the requirements under the other reporting principles;
- ensure consistency in the length of reporting periods;
- indicate the time period covered by the reported information.

See [section 5.1](#) in this Standard for information on aligning the reporting periods and publishing schedules of sustainability reporting and other types of reporting.

Verifiability

Requirement

- a. The organization shall gather, record, compile, and analyze information in such a way that the information can be examined to establish its quality.**

Guidance

It is important that the reported information can be examined to establish its veracity and to determine the extent to which the reporting principles have been applied.

To apply the Verifiability principle, the organization should:

- set up internal controls and organize documentation in such a way that individuals other than those preparing the reported information (e.g., internal auditors, external assurance providers) can review them;
- document the decision-making processes underlying the organization's sustainability reporting in a way that allows for the examination of the key decisions and processes, such as the process of determining material topics;
- if the organization designs information systems for its sustainability reporting, design these systems in a way that they can be examined as part of an external assurance process;
- be able to identify the original sources of the reported information and provide reliable evidence to support assumptions or calculations;
- be able to provide representation from the original sources of the reported information attesting to the accuracy of the information within acceptable margins of error;
- avoid including information that is not substantiated by evidence unless it is relevant for understanding the organization's impacts;
- provide clear explanations of any uncertainties associated with the reported information.

See [section 5.2](#) in this Standard for more information on enhancing the credibility of the organization's sustainability reporting.

5. Additional recommendations for reporting

This section presents recommendations for an organization to align its sustainability reporting with other types of reporting and to enhance the credibility of its sustainability reporting.

5.1 Aligning sustainability reporting with other reporting

An organization should align its sustainability reporting with other statutory and regulatory reporting, in particular its financial reporting. This means that the organization should report the information for the same reporting period and for the same group of entities as covered in its financial reporting. The organization should also publish the information at the same time as its financial reporting, where this is possible.

5.2 Enhancing the credibility of sustainability reporting

There are several ways in which an organization can enhance the credibility of its sustainability reporting. These include the use of internal controls, external assurance, and stakeholder or expert panels. The organization is not required to apply these methods when reporting in accordance with the GRI Standards but is encouraged to do so.

Internal controls

The organization should set up internal controls to strengthen the integrity and credibility of its sustainability reporting. Internal controls are processes designed and implemented by the organization, generally its management, to provide reasonable assurance regarding the achievement of its objectives.

Internal controls can be implemented in day-to-day operations and through compliance functions. The organization can also establish and maintain an internal audit function as part of its processes for risk management to further improve the credibility of its sustainability reporting.

In some jurisdictions, corporate governance codes require the highest governance body to inquire and, if it is satisfied, to confirm the adequacy of an organization's internal controls in the annual report. This confirmation may only relate to the adequacy of the internal controls for financial reporting. It may not provide information about whether the same internal controls are also adequate to assess the credibility of the organization's sustainability reporting. If the organization relies on internal controls set up for financial reporting, it should assess the relevance of these controls for its sustainability reporting. In cases where these controls are inadequate, the organization should identify and use additional internal controls to assess the credibility of its sustainability reporting.

External assurance

In addition to internal controls, the organization should seek external assurance for its sustainability reporting. [Disclosure 2-5 in GRI 2: General Disclosures 2021](#) requires the organization to describe its policy and practice for seeking external assurance for its sustainability reporting. If the sustainability reporting has been externally assured, the organization is also required to describe what was assured and on what basis.

External assurance comprises activities carried out by assurance providers to assess the quality and credibility of the qualitative and quantitative information reported by the organization. External assurance can also be used to assess the organization's systems or processes to prepare the information (e.g., the process of determining material topics). External assurance is different from activities used to assess or validate the performance, such as compliance assessments or the issuing of performance certifications.

External assurance results in published assurance reports or conclusions that can be used to verify that the information has been prepared in accordance with reporting standards. It can also be used to reduce risk in data quality and increase trust in the reported information. This, in turn, helps information users and the organization rely on the reported information for their decision-making.

External assurance should be conducted by competent assurance providers with appropriate experience and qualifications. Assurance providers should be:

- independent from the organization and therefore able to reach impartial and objective conclusions about the organization's reporting and to publish these conclusions in a report that is publicly available;
- demonstrably competent in the subject matter and assurance practices;
- competent in applying quality control procedures to the assurance engagement;
- able to conduct the engagement in a manner that is systematic, documented, evidence-based, and characterized

by defined procedures in line with professional standards for assurance;

- able to consider the selection of the information reported as well as its accuracy, and to assess whether the reporting provides a comprehensive picture of the organization's most significant impacts and how it manages these impacts;
- able to assess the extent to which the organization has applied the GRI Standards in formulating opinions or reaching conclusions.

Stakeholder or expert panels

The organization can also convene a stakeholder or expert panel to seek views on its approach to sustainability reporting or for advice on the information to be reported.

Glossary

This glossary provides definitions for terms used in this Standard. The organization is required to apply these definitions when using the GRI Standards.

The definitions included in this glossary may contain terms that are further defined in the complete [GRI Standards Glossary](#). All defined terms are underlined. If a term is not defined in this glossary or in the complete *GRI Standards Glossary*, definitions that are commonly used and understood apply.

business partner

entity with which the organization has some form of direct and formal engagement for the purpose of meeting its business objectives

Source: Shift and Mazars LLP, *UN Guiding Principles Reporting Framework*, 2015; modified

Examples: affiliates, business-to-business customers, clients, first-tier suppliers, franchisees, joint venture partners, investee companies in which the organization has a shareholding position

Note: Business partners do not include subsidiaries and affiliates that the organization controls.

business relationships

relationships that the organization has with business partners, with entities in its value chain including those beyond the first tier, and with any other entities directly linked to its operations, products, or services

Source: United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework*, 2011; modified

Note: Examples of other entities directly linked to the organization’s operations, products, or services are a non-governmental organization with which the organization delivers support to a local community or state security forces that protect the organization’s facilities.

child

person under the age of 15 years, or under the age of completion of compulsory schooling, whichever is higher

Note 1: Exceptions can occur in certain countries where economies and educational facilities are insufficiently developed, and a minimum age of 14 years applies. These countries of exception are specified by the International Labour Organization (ILO) in response to a special application by the country concerned and in consultation with representative organizations of employers and workers.

Note 2: The ILO *Minimum Age Convention*, 1973, (No. 138), refers to both child labor and young workers.

due diligence

process to identify, prevent, mitigate, and account for how the organization addresses its actual and potential negative impacts

Source: Organisation for Economic Co-operation and Development (OECD), *OECD Guidelines for Multinational Enterprises*, 2011; modified
United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework*, 2011; modified

Note: See [section 2.3 in GRI 1: Foundation 2021](#) for more information on ‘due diligence’.

employee

individual who is in an employment relationship with the organization according to national law or practice

governance body

formalized group of individuals responsible for the strategic guidance of the organization, the effective monitoring of management, and the accountability of management to the broader organization and its stakeholders

highest governance body

governance body with the highest authority in the organization

Note: In some jurisdictions, governance systems consist of two tiers, where supervision and management are separated or where local law provides for a supervisory board drawn from non-executives to oversee an executive management board. In such cases, both tiers are included under the definition of highest governance body.

human rights

rights inherent to all human beings, which include, at a minimum, the rights set out in the *United Nations (UN) International Bill of Human Rights* and the principles concerning fundamental rights set out in the *International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work*

Source: United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework*, 2011; modified

Note: See [Guidance to 2-23-b-i in GRI 2: General Disclosures 2021](#) for more information on ‘human rights’.

impact

effect the organization has or could have on the economy, environment, and people, including on their human rights, which in turn can indicate its contribution (negative or positive) to sustainable development

Note 1: Impacts can be actual or potential, negative or positive, short-term or long-term, intended or unintended, and reversible or irreversible.

Note 2: See [section 2.1 in GRI 1: Foundation 2021](#) for more information on ‘impact’.

Indigenous Peoples

Indigenous Peoples are generally identified as:

- tribal peoples in independent countries whose social, cultural and economic conditions distinguish them from other sections of the national community, and whose status is regulated wholly or partially by their own customs or traditions or by special laws or regulations;
- peoples in independent countries who are regarded as indigenous on account of their descent from the populations which inhabited the country, or a geographical region to which the country belongs, at the time of conquest or colonization or the establishment of present state boundaries and who, irrespective of their legal status, retain some or all of their own social, economic, cultural and political institutions.

Source: International Labour Organization (ILO), *Indigenous and Tribal Peoples Convention*, 1989 (No. 169)

local community

individuals or groups of individuals living or working in areas that are affected or that could be affected by the organization’s activities

Note: The local community can range from those living adjacent to the organization’s operations to those living at a distance.

material topics

topics that represent the organization’s most significant impacts on the economy, environment, and people, including impacts on their human rights

Note: See [section 2.2 in GRI 1: Foundation 2021](#) and [section 1 in GRI 3: Material Topics 2021](#) for more information on ‘material topics’.

mitigation

action(s) taken to reduce the extent of a negative impact

Source: United Nations (UN), *The Corporate Responsibility to Respect Human Rights: An Interpretive Guide*, 2012; modified

Note: The mitigation of an actual negative impact refers to actions taken to reduce the severity of the negative impact that has occurred, with any residual impact needing remediation. The mitigation of a potential negative impact refers to actions taken to reduce the likelihood of the negative impact occurring.

remedy / remediation

means to counteract or make good a negative impact or provision of remedy

Source: United Nations (UN), *The Corporate Responsibility to Respect Human Rights: An Interpretive Guide*, 2012; modified

Examples: apologies, financial or non-financial compensation, prevention of harm through injunctions or guarantees of non-repetition, punitive sanctions (whether criminal or administrative, such as fines), restitution, restoration, rehabilitation

reporting period

specific time period covered by the reported information

Examples: fiscal year, calendar year

severity (of an impact)

The severity of an actual or potential negative impact is determined by its scale (i.e., how grave the impact is), scope (i.e., how widespread the impact is), and irremediable character (how hard it is to counteract or make good the resulting harm).

Source: Organisation for Economic Co-operation and Development (OECD), *OECD Due Diligence Guidance for Responsible Business Conduct*, 2018; modified
United Nations (UN), *The Corporate Responsibility to Respect Human Rights: An Interpretive Guide*, 2012; modified

Note: See [section 1 in GRI 3: Material Topics 2021](#) for more information on 'severity'.

stakeholder

individual or group that has an interest that is affected or could be affected by the organization's activities

Source: Organisation for Economic Co-operation and Development (OECD), *OECD Due Diligence Guidance for Responsible Business Conduct*, 2018; modified

Examples: business partners, civil society organizations, consumers, customers, employees and other workers, governments, local communities, non-governmental organizations, shareholders and other investors, suppliers, trade unions, vulnerable groups

Note: See [section 2.4 in GRI 1: Foundation 2021](#) for more information on 'stakeholder'.

supplier

entity upstream from the organization (i.e., in the organization's supply chain), which provides a product or service that is used in the development of the organization's own products or services

Examples: brokers, consultants, contractors, distributors, franchisees, home workers, independent contractors, licensees, manufacturers, primary producers, sub-contractors, wholesalers

Note: A supplier can have a direct business relationship with the organization (often referred to as a first-tier supplier) or an indirect business relationship.

supply chain

range of activities carried out by entities upstream from the organization, which provide products or services that are used in the development of the organization's own products or services

sustainable development / sustainability

development that meets the needs of the present without compromising the ability of future

generations to meet their own needs

Source: World Commission on Environment and Development, *Our Common Future*, 1987

Note: The terms 'sustainability' and 'sustainable development' are used interchangeably in the GRI Standards.

value chain

range of activities carried out by the organization, and by entities upstream and downstream from the organization, to bring the organization's products or services from their conception to their end use

Note 1: Entities upstream from the organization (e.g., suppliers) provide products or services that are used in the development of the organization's own products or services. Entities downstream from the organization (e.g., distributors, customers) receive products or services from the organization.

Note 2: The value chain includes the supply chain.

vulnerable group

group of individuals with a specific condition or characteristic (e.g., economic, physical, political, social) that could experience negative impacts as a result of the organization's activities more severely than the general population

Examples: children and youth; elderly persons; ex-combatants; HIV/AIDS-affected households; human rights defenders; Indigenous Peoples; internally displaced persons; migrant workers and their families; national or ethnic, religious and linguistic minorities; persons who might be discriminated against based on their sexual orientation, gender identity, gender expression, or sex characteristics (e.g., lesbian, gay, bisexual, transgender, intersex); persons with disabilities; refugees or returning refugees; women

Note: Vulnerabilities and impacts can differ by gender.

worker

person that performs work for the organization

Examples: employees, agency workers, apprentices, contractors, home workers, interns, self-employed persons, sub-contractors, volunteers, and persons working for organizations other than the reporting organization, such as for suppliers

Note: In the GRI Standards, in some cases, it is specified whether a particular subset of workers is required to be used.

Bibliography

This section lists authoritative intergovernmental instruments used in developing this Standard.

Authoritative instruments:

1. International Labour Organization (ILO), *Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy*, 2017.
2. Organisation for Economic Co-operation and Development (OECD), *OECD Due Diligence Guidance for Responsible Business Conduct*, 2018.
3. Organisation for Economic Co-operation and Development (OECD), *OECD Guidelines for Multinational Enterprises*, 2011.
4. United Nations (UN), *Framework Convention on Climate Change (FCCC) Paris Agreement*, 2015.
5. United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations "Protect, Respect and Remedy" Framework*, 2011.
6. United Nations (UN), *Protect, Respect and Remedy: a Framework for Business and Human Rights*, 2008.
7. United Nations (UN), *Report of the Special Representative of the Secretary-General on the Issue of Human Rights and Transnational Corporations and Other Business Enterprises*, John Ruggie, 2011.
8. World Commission on Environment and Development, *Our Common Future*, 1987.

Guidance

This Appendix provides guidance on how to prepare the GRI content index when reporting in accordance with the GRI

Standards. It includes an example that the organization can use to prepare the content index. The organization can use a different format for the content index than the one provided here, as long as it complies with the requirements for the content index specified in [Requirement 7](#) in this Standard.

The organization can include additional information in the content index, beyond what is required by the GRI Standards. For example, the organization can show how the disclosures it has reported using the GRI Standards are related to those required by other reporting standards or frameworks.

The organization should make sure that such additions do not compromise the readability of the content index. This can be done by providing any additional information in separate columns or rows that are included at the end of the content index, after all the required information has been specified.

The organization should not report the information required by the disclosures directly in the content index. Exceptions can be made if the information is brief and easier to find in the content index than in other locations (e.g., information on the reporting period may be easier to find when stated directly in the content index); or to report that an item (e.g., committee, policy, practice, process) specified in a disclosure does not exist. Detailed reporting in the content index should be avoided.

	Statement of use The organization is required to include in the GRI content index the statement of use for reporting in accordance with the GRI Standards, as specified in Requirement 7-a-ii in this Standard. See Requirement 8 in this Standard for more information on the statement of use. GRI 1 used The organization is required to include in the GRI content index the title of GRI 1 it has used, as specified in Requirement 7-a-iii in this Standard. The title of GRI 1 includes the number, name, and publication year (e.g., <i>GRI 1: Foundation 2021</i>). GRI 1 does not contain disclosures, but it does specify the requirements for reporting in accordance with the GRI Standards. The GRI Standards are regularly updated, and a newer version of GRI 1 may have different requirements for reporting in accordance with the GRI Standards than its previous version. Indicating which version of GRI 1 the organization has used helps clarify which requirements it must comply with. Applicable GRI Sector Standard(s) The organization is required to include in the GRI content index the titles of the GRI Sector Standards that apply to its sectors, as specified in Requirement 7-a-iv in this Standard. The title of a GRI Sector Standard includes the number, name, and publication year (e.g., <i>GRI 11: Oil and Gas Sector 2021</i>).
	Titles of the GRI Standards and other sources of reported disclosures The organization is required to include in the GRI content index the titles of the GRI Universal Standards, GRI Sector Standards, and GRI Topic Standards it has used to report disclosures, as specified in Requirement 7-a-viii in this Standard. These include: • <i>GRI 2: General Disclosures 2021</i>; • <i>GRI 3: Material Topics 2021</i>; • the Topic Standards the organization has used for reporting on its material topics; • the Sector Standards the organization has used to report additional sector disclosures listed for its <u>material topics</u>. The title of a GRI Standard includes the number, name, and publication year (e.g., <i>GRI 303: Water and Effluents 2018</i>). The publication year indicates which version of a GRI Standard the organization has used. The GRI Standards are regularly updated, and a newer version of a GRI Standard may have different disclosures than its previous version. The publication year of the Standard does not refer to the <u>reporting period</u> covered by the reported information or to the year that the reported information is published. If the organization reports disclosures from other sources, the organization is required to include in the content index the titles of the sources it has used.

Disclosures

The organization is required to list in the GRI content index all the disclosures it has reported, as specified in [Requirement 7-a-vii](#) in this Standard. These include the disclosures from *GRI 2: General Disclosures 2021* and *GRI 3: Material Topics 2021*, and the disclosures it has reported for each material topic.

For each material topic the organization is required to list the disclosures it has reported from the GRI Topic Standards and GRI Sector Standards, as well as the disclosures it has reported from other sources. The organization should organize these disclosures by each material topic. See [Requirement 5-a](#) and [Requirement 5-b-i](#) in this Standard for more information on reporting disclosures for each material topic.

Besides the disclosures from the Topic Standards, the Sector Standards may list additional sector disclosures for organizations to report. Reporting these additional sector disclosures is a recommendation. If the organization reports any of these additional sector disclosures for its material topics, it is required to list them in the content index.

The organization is required to include the disclosure titles in the content index. The title of a disclosure includes the number and name (e.g., 2-6 Activities, value chain and other business relationships).

For disclosures from other sources, if there is no disclosure title available, the organization can list any other information that helps identify the disclosure.

GRI Topic Standards disclosures listed in the applicable GRI Sector Standards that are not reported

For each topic in the applicable GRI Sector Standards determined as material, the organization is required to include in the GRI content index any GRI Topic Standards disclosures listed for that topic that the organization does not report, as specified in [Requirement 7-a-ix](#) in this Standard.

There can be cases where a Topic Standard disclosure listed in the Sector Standard is not relevant to the organization's impacts in relation to the material topic. In such cases, the organization is required to provide the 'not applicable' reason for omission, and to briefly explain why the disclosure is not relevant. See [Requirement 5-b](#) in this Standard for more information on reporting on material topics covered in the Sector Standards.

Location

For each disclosure that it has reported, the organization is required to include in the GRI content index the location (i.e., the specific page numbers or links) in, for example, a report, document, website where the information can be found, as specified in [Requirement 7-a-xi](#) in this Standard. If the information reported for a disclosure is spread across multiple pages or web pages, the organization is required to specify all page numbers and links across which the information is distributed.

If the organization is required to report information that it has previously reported, and the information has not changed during the reporting period (e.g., the organization is required to report information about a policy or process that has not changed since the previous reporting period), the organization can republish this information or provide a reference to the previously reported information in the content index.

Omissions

The organization is required to include in the GRI content index the reasons for omission it has used for each disclosure or requirement it cannot comply with, as specified in [Requirement 7-a-xii](#) in this Standard.

If the organization cannot comply with a disclosure or with a requirement in a disclosure for which reasons for omission are permitted, the organization is required to specify the disclosure or the requirement it cannot comply with in the content index. It is also required to provide one of the permitted reasons for omission and the required explanation for that reason. The four permitted reasons for omission are: not applicable, legal prohibitions, confidentiality constraints, and information unavailable / incomplete. See [Requirement 6](#) in this Standard for more information on reasons for omission.

GRI Sector Standard reference numbers

When listing the GRI disclosures and additional sector disclosures from the applicable GRI Sector Standards in the GRI content index, the organization is required to include the GRI Sector Standard reference numbers, as specified in [Requirement 7-a-x](#) in this Standard. The GRI Sector Standard reference number refers to the unique identifier for each disclosure listed in a Sector Standard (e.g., S11.1.1). This identifier helps information users assess which of the disclosures listed in the Sector Standards are included in the organization's reporting.

Material topics

The organization is required to list its material topics in the GRI content index, as specified in [Requirement 7-a-v](#) in this Standard.

The list of material topics included in the content index is the same as the list of material topics reported under [3-2-a](#) in *GRI 3: Material Topics 2021*.

Topics in the applicable GRI Sector Standards determined as not material

The organization is required to list in the GRI content index any topics from the applicable GRI Sector Standards that it has determined as not material and explain why they are not material, as specified in [Requirement 7-a-vi](#) in this Standard. See [Requirement 3-b](#) in this Standard for more information on using the Sector Standards to determine material topics.

[Title of GRI Standard]	[Disclosure title]	

Guidance

This Appendix provides guidance on how to prepare the GRI content index when reporting with reference to the GRI Standards. It includes an example that the organization can use to prepare the content index. The organization can use a different format for the content index than the one provided here, as long as it complies with the requirements for the content index specified in 'Reporting with reference to the GRI Standards' at the end of section 3 of this Standard. The organization can also use the content index specified for reporting in accordance with the GRI Standards in [Appendix 1](#), if suitable. In such a case, the statement of use in Appendix 1, which is for reporting in accordance with the GRI Standards, must be replaced by the statement of use for reporting with reference to the GRI Standards.

The organization can include additional information in the content index, beyond what is required by the GRI Standards. For example, the organization can show how the disclosures it has reported using the GRI Standards are related to those required by other reporting standards or frameworks.

The organization should make sure that such additions do not compromise the readability of the content index. This can be done by providing any additional information in separate columns or rows that are included at the end of the content index, after all the required information has been specified.

The organization should not report the information required by the disclosures directly in the content index. Exceptions can be made if the information is brief and easier to find in the content index than in other locations (e.g., information on the reporting period may be easier to find when stated directly in the content index). Detailed reporting in the content index should be avoided.

	Statement of use The organization is required to include in the GRI content index the statement of use for reporting with reference to the GRI Standards, as specified in Requirement a-ii in 'Reporting with reference to the GRI Standards' at the end of section 3 of this Standard. See the requirement to provide a statement of use in 'Reporting with reference to the GRI Standards' at the end of section 3 of this Standard for more information on the statement of use. GRI 1 used The organization is required to include in the GRI content index the title of GRI 1 it has used, as specified in Requirement a-iii in 'Reporting with reference to the GRI Standards' at the end of section 3 of this Standard. The title of GRI 1 includes the number, name, and publication year (e.g., <i>GRI 1: Foundation 2021</i>). GRI 1 does not contain disclosures, but it does specify the requirements for reporting with reference to the GRI Standards. The GRI Standards are regularly updated, and a newer version of GRI 1 may have different requirements for reporting with reference to the GRI Standards than its previous version. Indicating which version of GRI 1 the organization has used helps clarify which requirements it must comply with.
	Titles of the GRI Standards of reported disclosures The organization is required to include in the GRI content index the titles of all the GRI Standards it has used to report disclosures, as specified in Requirement a-v in 'Reporting with reference to the GRI Standards' at the end of section 3 of this Standard. These can include <i>GRI 2: General Disclosures 2021</i>, <i>GRI 3: Material Topics 2021</i>, the GRI Sector Standards, and the GRI Topic Standards. The title of a GRI Standard includes the number, name, and publication year (e.g., <i>GRI 303: Water and Effluents 2018</i>). The publication year indicates which version of a GRI Standard the organization has used. The GRI Standards are regularly updated, and a newer version of a GRI Standard may have different disclosures than its previous version. The publication year of the Standard does not refer to the <u>reporting period</u> covered by the reported information or to the year that the reported information is published.
	Disclosures The organization is required to list in the GRI content index all the disclosures it has reported from the GRI Standards, as specified in Requirement a-iv in 'Reporting with reference to the GRI Standards' at the end of section 3 of this Standard. The organization is required to include the disclosure titles in the content index. The title of a disclosure includes the number and name (e.g., 303-3 Water withdrawal).
	Location For each disclosure that it has reported, the organization is required to include in the GRI content index the location (i.e., the specific page numbers and links) in, for example, a report, document, website where the information can be found, as specified in Requirement a-vi in 'Reporting with reference to the GRI Standards' at the end of section 3 of this Standard. If the information reported for a disclosure is spread across multiple pages or web pages, the organization is required to specify all page numbers and links across which the information is distributed.

GRI 2: General Disclosures 2021

Universal Standard

Effective Date

This Standard is effective for reports or other materials published on or after 1 January 2023

Responsibility

This Standard is issued by the [Global Sustainability Standards Board \(GSSB\)](#). Any feedback on the GRI Standards can be submitted to gssbsecretariat@globalreporting.org for the consideration of the GSSB.

Due Process

This Standard was developed in the public interest and in accordance with the requirements of the GSSB Due Process Protocol. It has been developed using multi-stakeholder expertise, and with regard to authoritative intergovernmental instruments and widely held expectations of organizations relating to social, environmental, and economic responsibilities.

Legal Liability

This document, designed to promote sustainability reporting, has been developed by the Global Sustainability Standards Board (GSSB) through a unique multi-stakeholder consultative process involving representatives from organizations and report information users from around the world. While the GRI Supervisory Board, Management Board, and GSSB encourage the use of the GRI Sustainability Reporting Standards (GRI Standards) and related Interpretations by all organizations, the preparation and publication of reports based fully or partially on the GRI Standards and related Interpretations are the full responsibility of those producing them. Neither the GRI Supervisory Board, Management Board, GSSB, nor Stichting Global Reporting Initiative (GRI) can assume responsibility for any consequences or damages resulting directly or indirectly from the use of the GRI Standards and related Interpretations in the preparation of reports, or the use of reports based on the GRI Standards and related Interpretations.

Copyright and trademark notice

This document is copyright-protected by Stichting Global Reporting Initiative (GRI). The reproduction and distribution of this document for information and/or use in preparing a sustainability report is permitted without prior permission from GRI. However, neither this document nor any extract from it may be reproduced, stored, translated, or transferred in any form or by any means (electronic, mechanical, photocopied, recorded, or otherwise) for any other purpose without prior written permission from GRI.

Introduction

GRI 2: General Disclosures 2021 contains disclosures for organizations to provide information about their reporting practices; activities and workers; governance; strategy, policies, and practices; and stakeholder engagement. This information gives insight into the profile and scale of organizations and provides a context for understanding their impacts.

The Standard is structured as follows:

- [Section 1](#) contains five disclosures, which provide information about the organization, its sustainability reporting practices, and the entities included in its sustainability reporting.
- [Section 2](#) contains three disclosures, which provide information about the organization's activities, employees, and other workers.
- [Section 3](#) contains thirteen disclosures, which provide information about the organization's governance structure, composition, roles, and remuneration.
- [Section 4](#) contains seven disclosures, which provide information about the organization's sustainable development strategy and its policies and practices for responsible business conduct.
- [Section 5](#) contains two disclosures, which provide information about the organization's stakeholder engagement practices and how it engages in collective bargaining with employees.
- The [Glossary](#) contains defined terms with a specific meaning when used in the GRI Standards. The terms are underlined in the text of the GRI Standards and linked to the definitions.
- The [Bibliography](#) lists authoritative intergovernmental instruments and additional references used in developing this Standard, as well as resources that the organization can consult.

The rest of the Introduction section provides an overview of the system of GRI Standards and further information on using this Standard.

System of GRI Standards

This Standard is part of the GRI Sustainability Reporting Standards (GRI Standards). The GRI Standards enable an organization to report information about its most significant impacts on the economy, environment, and people, including impacts on their human rights, and how it manages these impacts.

The GRI Standards are structured as a system of interrelated standards that are organized into three series: GRI Universal Standards, GRI Sector Standards, and GRI Topic Standards (see [Figure 1](#) in this Standard).

Universal Standards: GRI 1, GRI 2 and GRI 3

[GRI 1: Foundation 2021](#) specifies the requirements that the organization must comply with to report in accordance with the GRI Standards. The organization begins using the GRI Standards by consulting *GRI 1*.

GRI 2: General Disclosures 2021 contains disclosures that the organization uses to provide information about its reporting practices and other organizational details, such as its activities, governance, and policies.

[GRI 3: Material Topics 2021](#) provides guidance on how to determine material topics. It also contains disclosures that the organization uses to report information about its process of determining material topics, its list of material topics, and how it manages each topic.

Sector Standards

The Sector Standards provide information for organizations about their likely material topics. The organization uses the Sector Standards that apply to its sectors when determining its material topics and when determining what to report for each material topic.

Topic Standards

The Topic Standards contain disclosures that the organization uses to report information about its impacts in relation to particular topics. The organization uses the Topic Standards according to the list of material topics it has determined using *GRI 3*.

Figure 1. GRI Standards: Universal, Sector and Topic Standards

Using this Standard

An organization reporting in accordance with the GRI Standards is required to report all disclosures in this Standard. [Disclosure 2-2](#) in this Standard requires the organization to list its entities included in its sustainability reporting. These entities define the scope for reporting all other disclosures in this Standard.

Reasons for omission are permitted for all disclosures in this Standard except for:

- Disclosure 2-1 Organizational details
- Disclosure 2-2 Entities included in the organization's sustainability reporting
- Disclosure 2-3 Reporting period, frequency and contact point
- Disclosure 2-4 Restatements of information
- Disclosure 2-5 External assurance

If the organization cannot comply with a disclosure or with a requirement in a disclosure for which reasons for omission are permitted (e.g., because the required information is confidential or subject to legal prohibitions), the organization is required to specify the disclosure or the requirement it cannot comply with, and provide a reason for omission together with an explanation in the GRI content index. See [Requirement 6 in GRI 1: Foundation 2021](#) for more information on reasons for omission.

If the organization cannot report the required information about an item specified in a disclosure because the item (e.g., committee, policy, practice, process) does not exist, it can comply with the requirement by reporting this to be the case. The organization can explain the reasons for not having this item, or describe any plans to develop it. The disclosure does not require the organization to implement the item (e.g., developing a policy), but to report that the item does not exist.

If the organization intends to publish a standalone sustainability report, it does not need to repeat information that it has already reported publicly elsewhere, such as on web pages or in its annual report. In such a case, the organization can report a required disclosure by providing a reference in the GRI content index as to where this information can be found (e.g., by providing a link to the web page or citing the page in the annual report where the information has been published).

Requirements, guidance and defined terms

The following apply throughout the GRI Standards:

Requirements are presented in **bold font** and indicated by the word 'shall'. An organization must comply with requirements to report in accordance with the GRI Standards.

Requirements may be accompanied by guidance.

Guidance includes background information, explanations, and examples to help the organization better understand the requirements. The organization is not required to comply with guidance.

The Standards may also include recommendations. These are cases where a particular course of action is encouraged but not required.

The word 'should' indicates a recommendation, and the word 'can' indicates a possibility or option.

Defined terms are underlined in the text of the GRI Standards and linked to their definitions in the [Glossary](#). The organization is required to apply the definitions in the Glossary.

1. The organization and its reporting practices

The disclosures in this section provide an overview of the organization, its sustainability reporting practices, and the entities included in its sustainability reporting.

جزئیات سازمانی

Disclosure 2-1 Organizational details

REQUIREMENTS	The organization shall: a. report its legal name; b. report its nature of ownership and legal form; c. report the location of its headquarters; d. report its countries of operation. نام قانونی خود را گزارش دهد ماهیت مالکیت و شکل قانونی خود را گزارش دهد مکان دفتر مرکزی خود را گزارش دهد کشورهای محل عملیات خود را گزارش دهد
GUIDANCE	Guidance to 2-1-a If the organization uses a commonly known trading name or business name that is different from its legal name, it should report this in addition to its legal name. Guidance to 2-1-b The nature of ownership and the legal form of the organization refers to whether it is publicly or privately owned, and whether it is an incorporated entity, a partnership, a sole proprietorship, or another type of entity such as a nonprofit, an association, or a charity. Guidance to 2-1-c Headquarters are an organization's global administrative center, the place from which it is controlled or directed. Guidance to 2-1-d If the organization has reported its countries of operation elsewhere, such as in its audited consolidated financial statements or financial information filed on public record, the organization can provide a link or reference to this information. The organization can also report the regions or specific locations within countries (e.g., states, cities) where it has operations, if this provides contextual information for understanding the organization's <u>impacts</u>. ماهیت مالکیت و شکل قانونی سازمان به این اشاره دارد که آیا سازمان به صورت عمومی یا خصوصی مالکیت دارد و آیا یک نهاد ثبت شده، شراکت، مالکیت انفرادی یا نوع دیگری از نهاد مانند غیرانتفاعی، انجمن یا خیریه است. سازمان همچنین می تواند مناطق یا مکان های خاص در کشورها (مانند ایالت ها، شهرها) که در آن ها عملیات دارد را گزارش دهد، اگر این اطلاعات به درک تأثیرات سازمان کمک کند.

Disclosure 2-2 Entities included in the organization's sustainability reporting

REQUIREMENTS

The organization shall:

- a. list all its entities included in its sustainability reporting;
- b. if the organization has audited consolidated financial statements or financial information filed on public record, specify the differences between the list of entities included in its financial reporting and the list included in its sustainability reporting;
- c. if the organization consists of multiple entities, explain the approach used for consolidating the information, including:
 - i. whether the approach involves adjustments to information for minority interests;
 - ii. how the approach takes into account **mergers, acquisitions, and disposal of entities or parts of entities**; ادغام‌ها، اکتساب‌ها و واگذاری نهادها یا بخش‌هایی از نهادها
 - iii. whether and how the approach differs across the disclosures in this Standard and across **material topics**.

اگر سازمان دارای صورت‌های مالی تلفیقی حسابرسی‌شده یا اطلاعات مالی ثبت‌شده در اسناد عمومی باشد، تفاوت‌های بین فهرست نهادهای شامل‌شده در گزارش‌دهی مالی و فهرست نهادهای شامل‌شده در گزارش‌دهی پایداری را مشخص کند؛

GUIDANCE

Guidance to 2-2-a. نهادهای گزارش‌شده تحت بند 2-2-الف اساس گزارش‌دهی افشاگری‌های این استاندارد و تعیین موضوعات با اهمیت سازمان را تشکیل می‌دهند.

The entities reported under 2-2-a form the basis for reporting the disclosures in this Standard and for determining the organization's material topics.

Requirement 2-2-a includes those entities that the organization controls or has an interest in and are included in its sustainability reporting, such as subsidiaries, joint ventures, and affiliates, including minority interests. The organization should report information for the same group of entities as covered in its financial reporting.

When determining its material topics, the organization should consider the impacts of additional entities with which it has business relationships that are not included in the list reported under 2-2-a. See [section 1 in GRI 3: Material Topics 2021](#) for more information.

Guidance to 2-2-a and 2-2-b

If all the entities in the organization's financial reporting are also included in its sustainability reporting, a brief statement of this fact, including a link or reference to the list of entities included in its audited consolidated financial statements or financial information filed on public record, is sufficient to comply with 2-2-a and 2-2-b.

The organization should separately specify any additional entities included in the sustainability reporting that are not included in its financial reporting.

Guidance to 2-2-c

A **minority interest** is an ownership interest in an entity that is not controlled by the parent entity.

منافع اقلیت به سهمی از مالکیت در یک نهاد اشاره دارد که توسط نهاد مادر کنترل نمی‌شود.

Disclosure 2-3 Reporting period, frequency and contact point

REQUIREMENTS

The organization shall:

- a. specify the **reporting period** for, and the frequency of, its sustainability reporting;
- b. specify the reporting period for its **financial reporting** and, if it does not align with the period for its sustainability reporting, explain the reason for this;
- c. report the **publication date** of the report or reported information;
- d. specify the contact point for **questions about the report** or reported information.

GUIDANCE

Guidance to 2-3-a

The organization can specify the frequency of sustainability reporting as 'annual'. See the [Timeliness principle in GRI 1: Foundation 2021](#) for more information.

Guidance to 2-3-a and 2-3-b

The reporting period refers to the time period covered by the reported information and should include the start and end dates (e.g., 1 January 2022 to 31 December 2022, 1 July 2022 through 30 June 2023).

The organization should report the information for the same reporting period as covered in its financial reporting. The organization should also publish the information at the same time as its financial reporting, where this is possible.

Disclosure 2-4 Restatements of information

REQUIREMENTS

The organization shall:

- a. report restatements of information made from previous **reporting periods** and explain:
 - i. the reasons for the restatements;
 - ii. the effect of the restatements.

GUIDANCE

The organization should provide a restatement of information when it has learned that the **previously reported information needs to be revised**. Restatements of information from previous reporting periods can **correct an error, or account for changes in measurement methodology or to the nature of the business**. Restatements of information ensure consistency and enable comparability of information between reporting periods. See the [Comparability principle in GRI 1: Foundation 2021](#) for more information.

سازمان باید معیارهای مورد استفاده برای تعیین اینکه چه زمانی تغییر یا خطا در اطلاعات گزارش شده قبلی به اندازه کافی مهم است که نیاز به بازنگری دارد را گزارش دهد.

The organization **should report the criteria used to determine when a change or error in previously reported information is considered significant enough to provide a restatement**. A change or error could be significant when it influences information users' decision-making (e.g., it influences the analysis of the changes in the organization's impacts over time).

For example, if an organization adopts a new, more accurate method for measuring greenhouse gas (GHG) emissions, it may subsequently experience a reduction in its previously reported GHG emissions that meets the organization's restatement criteria. The organization then restates its previously reported GHG emissions. In such a case, the organization is required to explain that **it has restated its previously reported GHG emissions due to the new measurement methodology and that this has resulted in lower GHG emissions than previously reported. The organization should also report the quantitative change observed (e.g., GHG emissions are 10% lower than the emissions previously reported)**.

If the organization has not made any restatement in the reporting period, a brief statement of this fact is sufficient to comply with the requirement.

Guidance to 2-4-a-i

Examples of **reasons** for restatements of information include:

- change of base period or length of the reporting period;
- change in the nature of the business;
- change in the measurement methodologies or in the definitions used;
- disposals, mergers, or acquisitions;
- error made in previous reporting periods.

Guidance to 2-4-a-ii

The effect of the restatement refers to the consequences of the change or correction made to previously reported information. If the restatement relates to quantitative information, the organization should specify the quantitative change in the restated information (e.g., GHG emissions are 10% lower compared to the level of emissions previously reported).

Disclosure 2-5 External assurance

REQUIREMENTS

The organization shall:

سیاست و رویه خود برای جستجوی اطمینان بخشی خارجی را شرح دهد

- a. describe its policy and practice for seeking external assurance, including whether and how the highest governance body and senior executives are involved;
- b. if the organization's sustainability reporting has been externally assured:
 - i. provide a link or reference to the external assurance report(s) or assurance statement(s);
 - ii. describe what has been assured and on what basis, including the assurance standards used, the level of assurance obtained, and any limitations of the assurance process;
 - iii. describe the relationship between the organization and the assurance provider.

GUIDANCE

See [section 5.2 in GRI 1: Foundation 2021](#) for information on external assurance.

Guidance to 2-5-b-ii

If this information is covered in the external assurance reports or statements that the organization has provided a link or a reference to under 2-5-b-i, then a brief statement of this fact is sufficient to comply with the requirement.

The organization can also describe, in accessible language:

- the scope of information and processes covered;
- the responsibilities of the organization relative to the assurance provider;
- the opinion or conclusions formally signed off by the assurance provider;
- a summary of the work performed;
- information on the experience and qualifications of the assurance provider, e.g., profile and level of subject matter expertise of the individuals involved.

Guidance to 2-5-b-iii

An assurance provider conducting external assurance needs to demonstrate independence from the organization to reach and publish objective and impartial conclusions about the organization's sustainability reporting.

2. Activities and workers

The disclosures in this section provide an overview of the organization's activities, employees, and other workers.

فعالیت‌ها، زنجیره ارزش و سایر روابط تجاری

Disclosure 2-6 Activities, value chain and other business relationships

REQUIREMENTS

The organization shall:

- a. report the sector(s) in which it is active; بخش(های) فعالیتی که در آن‌ها فعالیت می‌کند را گزارش دهد
- b. describe its value chain, including:
 - i. the organization's activities, products, services, and markets served;
 - ii. the organization's supply chain;
 - iii. the entities downstream from the organization and their activities;
- c. report other relevant business relationships;
- d. describe **significant** changes in 2-6-a, 2-6-b, and 2-6-c compared to the previous reporting period.

GUIDANCE

Guidance to 2-6-a

Sectors can be identified according to **categories**, such as the **public or private sector**; or **industry-specific categories**, such as the **education sector or the financial sector**.

Depending on the organization's activities, sectors can be identified using the **GRI Sector Standards** or classification systems such as the Global Industry Classification Standard (**GICS®**), the Industry Classification Benchmark (**ICB**), the International Standard Industrial Classification of All Economic Activities (**ISIC**), and the Sustainable Industry Classification System (**SICS®**).

Guidance to 2-6-b

The organization's value chain includes the range of activities carried out by the organization, and by entities upstream and downstream from the organization, to bring the organization's products or services from their conception to their end use. Entities upstream from the organization provide products or services used in the development of the organization's own products or services. Entities downstream from the organization are those that receive products or services from the organization. Entities in the value chain include entities beyond the first tier, both upstream and downstream.

The information reported under 2-6-b provides a context for understanding the **organization's impacts across its value chain**, including through the use of its products and services. Describing the markets served provides further information on the groups of customers targeted by the organization's products and services.

The organization is not required to provide a detailed description of each activity in its value chain. Instead, it can provide a high-level overview of its value chain.

Guidance to 2-6-b-i

When describing its **activities**, the organization **should report its total number of operations and explain how it defines 'operation'**.

When describing its **products and services**, the organization should report:

- the quantity of products or services provided during the reporting period (e.g., number of products or services provided, net sales of products or services provided);
- whether it sells products or services that are banned in certain markets or are the subject of stakeholder concerns or public debate, including the reason for the ban or concerns and how the organization has responded to these concerns.

When describing the **markets served**, the organization can report:

زنجیره ارزش سازمان شامل مجموعه فعالیت‌هایی است که توسط سازمان و نهادهای بالادستی و پایین‌دستی از سازمان انجام می‌شود تا محصولات یا خدمات سازمان از مرحله طراحی تا استفاده نهایی ارائه شوند. نهادهای بالادستی محصولاتی یا خدماتی ارائه می‌دهند که در توسعه محصولات یا خدمات سازمان استفاده می‌شوند. نهادهای پایین‌دستی دریافت‌کنندگان محصولات یا خدمات سازمان هستند. نهادهای زنجیره ارزش شامل نهادهای فراتر از سطح اول، چه در بالادست و چه در پایین‌دست، می‌شوند.

- the geographic locations where products and services are offered;
- the demographic or other characteristics of the markets;
- information on the size and relative importance of the markets (e.g., net sales, net revenues).

Guidance to 2-6-b-ii

The organization can describe:

- the types of suppliers (e.g., brokers, contractors, wholesalers);
- the estimated number of suppliers throughout its supply chain and in each tier (e.g., first tier, second tier);
- the types of activities related to the organization's products and services carried out by its suppliers (e.g., manufacturing, providing consulting services);
- the nature of its business relationships with its suppliers (e.g., long-term or short-term, contractual or non-contractual, project-based or event-based);
- the sector-specific characteristics of its supply chain (e.g., labor-intensive);
- the estimated monetary value of payments made to its suppliers;
- the geographic location of its suppliers.

Guidance to 2-6-b-iii

The organization can describe:

- the types of downstream entities (e.g., customers, beneficiaries);
- the estimated number of downstream entities;
- the types of activities related to the organization's products and services carried out by the downstream entities (e.g., manufacturing, wholesale, retail);
- the nature of its business relationships with the downstream entities (e.g., long-term or short-term, contractual or non-contractual, project-based or event-based);
- the geographic location of the downstream entities.

Guidance to 2-6-c

Other relevant business relationships include relationships that the organization has with entities that are not described as part of its value chain under 2-6-b. These may include business partners (e.g., joint ventures) and other entities directly linked to the organization's operations, products, or services (for examples, see the note in the definition of 'business relationships').

The organization can report the types of entities, their activities, and their geographic location.

Guidance to 2-6-d

Requirement 2-6-d entails describing significant changes in the organization's sectors, value chain, and other business relationships compared to the previous reporting period. This information can help explain changes to the organization's impacts. Examples of significant changes that can be reported under this disclosure are changes in activities such as the opening, closing, or expansion of facilities; changes in the structure of the organization's supply chain or in its relationships with suppliers, including selection and termination; or changes in the location of its suppliers.

افشاگری 2-6 سازمان را ملزم می‌کند تا بخش‌های فعالیت، زنجیره ارزش (شامل فعالیت‌ها، محصولات، خدمات، بازارها، زنجیره تأمین و نهادهای پایین‌دستی)، روابط تجاری مرتبط و تغییرات قابل‌توجه نسبت به دوره گزارش‌دهی قبلی را گزارش دهد.

Disclosure 2-7 Employees

REQUIREMENTS

The organization shall:

- a. report the total number of **employees**, and a breakdown of this total by gender and by region;
- b. report the total number of:
 - i. **permanent employees**, and a breakdown by gender and by region;
 - ii. **temporary employees**, and a breakdown by gender and by region;
 - iii. **non-guaranteed hours employees**, and a breakdown by gender and by region;
 - iv. **full-time employees**, and a breakdown by gender and by region;
 - v. **part-time employees**, and a breakdown by gender and by region;
- c. describe the methodologies and assumptions used to compile the data, including whether the numbers are reported:
 - i. in head count, **full-time equivalent (FTE)**, or using another methodology;
 - ii. at the end of the **reporting period**, as an average across the reporting period, or using another methodology;
- d. report contextual information necessary to understand the data reported under 2-7-a and 2-7-b;
- e. describe significant fluctuations in the number of employees during the reporting period and between reporting periods.

تعداد افراد (Head Count): یعنی تعداد واقعی افراد، بدون توجه به اینکه تمام‌وقت یا پاره‌وقت هستند (مثلاً اگر 10 نفر دارید، 10 گزارش می‌شود، حتی اگر بعضی‌ها پاره‌وقت باشند). معادل تمام‌وقت (FTE): یعنی تعداد کارکنان را بر اساس ساعات کاری تمام‌وقت محاسبه می‌کنید (مثلاً اگر دو نفر هر کدام نصف وقت کار کنند، معادل یک کارمند تمام‌وقت می‌شود). روش دیگری: اگر از روش خاصی استفاده کرده‌اید که با این دو فرق دارد، باید آن را توضیح دهید.

توضیح دهید که داده‌های مربوط به تعداد کارکنان (مثل تعداد کل، دائم، موقت و غیره) چگونه جمع‌آوری و گزارش شده‌اند. مثلاً میانگین تعداد کارکنان در کل سال ۲۰۲۲. این تغییرات در طول سال (مثل استخدام یا اخراج) را در نظر می‌گیرد یا روش دیگری؟

GUIDANCE

Together with [Disclosure 2-8](#), this disclosure gives insight into the organization's approach to employment, including the scope and nature of **impacts** arising from its employment practices. It also provides contextual information that aids an understanding of the information reported in other disclosures, and serves as the basis for calculation in other disclosures, such as [Disclosure 2-21 Annual total compensation ratio](#) and [Disclosure 2-30 Collective bargaining agreements](#) in this Standard.

This disclosure covers all employees who perform work for any of the organization's entities included in its sustainability reporting as reported under [Disclosure 2-2](#) in this Standard.

See references [7], [19], [22], [23], [24], [26], and [30] in the [Bibliography](#).

Guidance to 2-7-a

An employee is an individual who is in an employment relationship with the organization according to national law or practice.

Providing a breakdown of employees by gender gives insight into gender representation across the organization. Providing a breakdown of employees by region gives insight into regional variations. A region can refer to a country or other geographic locations, such as a city or a world region.

See [Table 1](#) and [Table 2](#) of this Standard for examples of how to present this information.

Guidance to 2-7-b

The definitions of permanent, temporary, non-guaranteed hours, full-time, and part-time employees differ between countries. If the organization has employees in more than one country, it should use the definitions as per the national laws of the countries where the employees are based to calculate country-level data. The country-level data should then be added up to calculate total numbers, disregarding differences in national legal definitions.

Non-guaranteed hours employees are employed by the organization without a guarantee of a minimum or fixed number of working hours. The employee may need to make themselves available for work as required, but the organization is not contractually obligated to offer the employee a minimum or fixed number of working hours per day, week, or month. Casual employees, employees with zero-hour contracts, and on-call employees are examples that fall under this category.

If the organization is unable to report exact figures, it can report estimates of the number of employees to the nearest ten or, where the number of employees is greater than 1,000, to the

nearest 100, and explain this under 2-7-c.

See [Table 1](#) and [Table 2](#) of this Standard for examples of how to present this information.

Guidance to 2-7-c

The organization can report the total number of employees and the number of permanent, temporary, non-guaranteed hours, full-time, and part-time employees in head count or full-time equivalent (FTE). Reporting these numbers in head count gives insight into the number of individual employees, whether full-time or part-time employed. Reporting these numbers in FTE gives insight into the hours worked.

The organization can use another methodology for reporting these numbers.

Reporting the number of employees at the end of the reporting period provides information for that point in time, without capturing fluctuations during the reporting period. Reporting these numbers in averages across the reporting period takes into account fluctuations during the reporting period.

Guidance to 2-7-d

Quantitative data, such as the number of temporary or part-time employees, is unlikely to be sufficient on its own. For example, a high proportion of temporary or part-time employees could indicate lack of employment security for employees, but it could equally signal workplace flexibility when offered as a voluntary choice. For this reason, the organization is required to report contextual information to help information users interpret the data.

The organization can explain the reasons for temporary employment. An example of such a reason is the recruitment of employees to undertake work on a temporary or seasonal project or event. Another example is the standard practice to offer a temporary contract (e.g., six months) to new employees before an offer of permanent employment is made. The organization can also explain the reasons for non-guaranteed hours employment.

The organization can explain how it defines full-time employment. If the organization has employees in more than one country, it can report the definitions of full-time employment it uses for the regions that cover these countries. The organization can also explain the reasons for part-time employment. Examples of such reasons are to accommodate employees' requests to work reduced hours, or because the organization is unable to provide full-time employment to all employees.

If there are differences in permanent, temporary, non-guaranteed hours, full-time, and part-time employment between genders or between regions, the organization can explain the reasons for these differences.

Guidance to 2-7-e

Requirement 2-7-e enables the organization to explain how the numbers of employees vary during the reporting period compared to the previous reporting periods (i.e., whether the numbers have increased or decreased). It can also include the reasons for the fluctuations. For example, an increase in the number of employees during the reporting period could be due to a seasonal event. Conversely, a decrease in the number of employees compared to the previous reporting period could be due to the completion of a temporary project.

It is up to the organization to determine which fluctuations in the number of employees it considers significant to report under 2-7-e. The organization should report its threshold for determining significant fluctuations.

If there are no significant fluctuations in the number of employees during the reporting period or between reporting periods, a brief statement of this fact is sufficient to comply with the requirement.

Table 1. Example template for presenting information on employees by gender

[Reporting period]				
FEMALE	MALE	OTHER*	NOT DISCLOSED	TOTAL
Number of employees (head count / FTE)				
Number of permanent employees (head count / FTE)				
Number of temporary employees (head count / FTE)				
Number of non-guaranteed hours employees (head count / FTE)				
Number of full-time employees (head count / FTE)				
Number of part-time employees (head count / FTE)				

* Gender as specified by the employees themselves.

Table 2. Example template for presenting information on employees by region

[Reporting period]		
REGION A	REGION B	TOTAL
Number of employees (head count / FTE)		
Number of permanent employees (head count / FTE)		
Number of temporary employees (head count / FTE)		
Number of non-guaranteed hours employees (head count / FTE)		
Number of full-time employees (head count / FTE)		
Number of part-time employees (head count / FTE)		

Disclosure 2-8 Workers who are not employees

REQUIREMENTS

The organization shall:

- a. report the total number of workers who are not employees and whose work is controlled by the organization and describe:
 - i. the most common types of worker and their contractual relationship with the organization;
 - ii. the type of work they perform;
- b. describe the methodologies and assumptions used to compile the data, including whether the number of workers who are not employees is reported:
 - i. in head count, full-time equivalent (FTE), or using another methodology;
 - ii. at the end of the reporting period, as an average across the reporting period, or using another methodology;
- c. describe significant fluctuations in the number of workers who are not employees during the reporting period and between reporting periods.

GUIDANCE

This disclosure provides an understanding of how much the organization relies on workers who are not employees to perform its work, in comparison to employees. This information is important for understanding how many workers in total perform work for the organization, because workers who are not employees are not represented in employment figures reported under [Disclosure 2-7](#).

Disclosure 2-8, together with Disclosure 2-7, gives insight into the organization's approach to employment, as well as the scope and nature of impacts arising from its employment practices. It also provides contextual information that aids an understanding of the information reported in other disclosures.

This disclosure covers all workers who are not employees and whose work is controlled by any of the organization's entities included in its sustainability reporting as reported under [Disclosure 2-2](#) in this Standard.

If all the workers performing work for the organization are employees and the organization does not have any workers who are not employees, a brief statement of this fact is sufficient to comply with the requirements under this disclosure.

See references [7], [19], [22], [23], [24], [26], and [30] in the [Bibliography](#).

Guidance to 2-8-a

Workers who are not employees are those who perform work for the organization but are not in an employment relationship with the organization.

This disclosure requires the organization to report the number of workers who are not employees and whose work is controlled by the organization. Control of work implies that the organization directs the work performed or has control over the means or methods for performing the work.

The organization might have sole control of the work or share control with one or more organizations (e.g., suppliers, customers, or other business partners, such as in joint ventures). Types of workers who are not employees and whose work is controlled by the organization include agency workers, apprentices, contractors, home workers, interns, self-employed persons, sub-contractors, and volunteers. The organization should report how it has determined when it has control of the work for workers who are not employees.

The following are examples of workers who are not employees and whose work is controlled by the organization. The following workers are included under this disclosure:

- Contractors hired by the organization to perform work at the organization's workplace, in a public area (e.g., on a road), or directly at the workplace of the organization's client.
- Workers of one of the organization's suppliers, where the organization instructs the supplier to use particular materials or work methods to manufacture the products or deliver the services.
- Volunteers or interns performing work for the organization.

The following are examples of workers who are not employees and whose work is not controlled by the organization. The following workers are not included under this disclosure:

- Workers of an equipment supplier to the organization who perform regular maintenance on the supplier's equipment (e.g., photocopy machines at the organization's workplace) as stipulated in the contract between the equipment supplier and the organization.
- Workers of one of the organization's suppliers, if the organization sources standard products manufactured using the supplier's production methods (e.g., purchasing stationery that is a standard product of the supplier).

If the organization cannot report exact figures, it can report estimates of the number of workers who are not employees to the nearest ten or, where the number of workers who are not employees is greater than 1,000, to the nearest 100, and explain this under 2-8-b.

Guidance to 2-8-a-i and 2-8-a-ii

When reporting its contractual relationship with the most common types of workers, the organization should report whether it engages them directly or indirectly through a third party, and in the latter case, who this third party is (e.g., employment agency, contractor).

It is sufficient that the organization provides a general description. The organization is not required to report the type of worker, contractual relationship, and work performed for every worker who is not an employee.

Guidance to 2-8-b

The organization can report the number of workers who are not employees in head count or full-time equivalent (FTE). The head count gives insight into the number of individual workers, whether on a full-time or part-time basis. The FTE gives insight into the hours worked. The organization can use another methodology for reporting this number.

Reporting the number of workers who are not employees at the end of the reporting period provides information for that point in time without capturing fluctuations during the reporting period. Reporting this number as an average across the reporting period takes into account fluctuations during the reporting period.

Guidance to 2-8-c

Requirement 2-8-c enables the organization to explain how the number of workers who are not employees varies during the reporting period or compared to previous reporting periods (i.e., whether the numbers have increased or decreased). It can also include the reasons for the fluctuations. For example, an increase in the number of workers who are not employees during the reporting period could be due to a seasonal event. Conversely, a decrease in the number of workers who are not employees compared to the previous reporting period could be due to the completion of a temporary project.

It is up to the organization to determine which fluctuations in the number of workers it considers significant to report under 2-8-c. The organization should report its threshold for determining significant fluctuations.

If there are no significant fluctuations in the number of workers who are not employees during the reporting period or between reporting periods, a brief statement of this fact is sufficient to comply with the requirement.

3. Governance

The disclosures in this section provide information about the organization's governance structure, composition, knowledge, roles, and remuneration.

The information reported under these disclosures is important for understanding how the management of the organization's impacts on the economy, environment, and people, including impacts on their human rights, is integrated into the organization's strategy and operations. It addresses how the governance bodies are set up and how well equipped they are to oversee the management of the organization's impacts. It also facilitates an understanding of the role and the responsibilities of governance bodies with respect to these impacts.

If the organization intends to publish a standalone sustainability report, it does not need to repeat information that it has already reported publicly elsewhere, such as on web pages or in its annual report. In such a case, the organization can report a required disclosure by providing a reference in the GRI content index as to where this information can be found (e.g., by providing a link to the web page or citing the page in the annual report where the information has been published).

ساختار و ترکیب حاکمیتی

Disclosure 2-9 Governance structure and composition

REQUIREMENTS

The organization shall:

- a. describe its governance structure, including committees of the highest governance body;
- b. list the committees of the highest governance body that are responsible for decision-making on and overseeing the management of the organization's impacts on the economy, environment, and people;
- c. describe the composition of the highest governance body and its committees by:
 - i. executive and non-executive members;
 - ii. independence;
 - iii. tenure of members on the governance body;
 - iv. number of other significant positions and commitments held by each member, and the nature of the commitments;
 - v. gender;
 - vi. under-represented social groups;
 - vii. competencies relevant to the impacts of the organization;
 - viii. stakeholder representation.

سازمان را ملزم می‌کند تا ساختار حاکمیتی، کمیته‌های بالاترین نهاد حاکمیتی، مسئولیت‌های آن‌ها در مدیریت تأثیرات سازمان بر اقتصاد، محیط‌زیست و افراد، و ترکیب این نهاد و کمیته‌هایش (شامل اعضای اجرایی و غیراجرایی، استقلال، مدت خدمت، تعهدات دیگر، جنسیت، گروه‌های اجتماعی کمتر نمایندگی‌شده، شایستگی‌ها و نمایندگی ذینفعان) را شرح دهد.

ترکیب بالاترین نهاد حاکمیتی و کمیته‌های آن را بر اساس موارد زیر شرح دهد.

GUIDANCE

Guidance to 2-9-c

The organization can describe the composition of the highest governance body and its committees by additional indicators of diversity, such as age, ancestry and ethnic origin, citizenship, creed, disability, or any other indicators of diversity that are relevant for reporting.

Guidance to 2-9-c-ii

'Independence' refers to conditions that enable the members of the highest governance body to exercise independent judgment free from any external influence or conflicts of interest. See reference [20] in the [Bibliography](#) for more information on independence criteria for governance bodies.

Guidance to 2-9-c-iv

A position or commitment held by a highest governance body member is significant when the time and attention it demands compromises the member's ability to perform its duties in the organization. Significant positions can include cross-board memberships.

Guidance to 2-9-c-vii

Competencies relevant to the impacts of the organization include competencies relevant to impacts commonly associated with the organization's sectors, products, and geographic locations.

Disclosure 2-10 Nomination and selection of the highest governance body

سازمان را ملزم می‌کند تا فرآیندهای نامزدی و انتخاب اعضای بالاترین نهاد حاکمیتی و کمیته‌های آن، و معیارهای مورد استفاده برای این انتخاب‌ها (شامل در نظر گرفتن دیدگاه‌های ذینفعان، تنوع، استقلال و شایستگی‌های مرتبط با تأثیرات سازمان) را شرح دهد.

REQUIREMENTS	The organization shall: a. describe the nomination and selection processes for the <u>highest governance body</u> and its committees; b. describe the criteria used for nominating and selecting highest governance body members, including whether and how the following are taken into consideration: i. views of <u>stakeholders</u> (including shareholders); ii. diversity; iii. independence; iv. competencies relevant to the <u>impacts</u> of the organization.
--------------	--

GUIDANCE	Guidance to 2-10-b-iii 'Independence' refers to conditions that enable the members of the highest governance body to exercise independent judgment free from any external influence or <u>conflicts of interest</u>. See reference [20] in the Bibliography for more information on independence criteria for governance bodies.
----------	---

Guidance to 2-10-b-iv

Competencies relevant to the impacts of the organization include competencies relevant to impacts commonly associated with the organization's sectors, products, and geographic locations.

Disclosure 2-11 Chair of the highest governance body**REQUIREMENTS**

The organization shall:

مدیر ارشد اجرایی

- a. report whether the chair of the highest governance body is also a senior executive in the organization;
- b. if the chair is also a senior executive, explain their function within the organization's management, the reasons for this arrangement, and how conflicts of interest are prevented and mitigated.

Disclosure 2-12 Role of the highest governance body in overseeing the management of impacts

سازمان را ملزم می‌کند تا نقش بالاترین نهاد حاکمیتی و مدیران ارشد در تدوین، تصویب و به‌روزرسانی بیانیه‌های هدف، ارزش‌ها، استراتژی‌ها، سیاست‌ها و اهداف مرتبط با توسعه پایدار، نظارت بر فرآیندهای شناسایی و مدیریت تأثیرات سازمان بر اقتصاد، محیط‌زیست و افراد، تعامل با ذینفعان، و بررسی اثربخشی این فرآیندها به همراه تناوب این بررسی‌ها را شرح دهد.

REQUIREMENTS

The organization shall:

- a. describe the role of the highest governance body and of senior executives in developing, approving, and updating the organization's purpose, value or mission statements, strategies, policies, and goals related to sustainable development;
- b. describe the role of the highest governance body in overseeing the organization's due diligence and other processes to identify and manage the organization's impacts on the economy, environment, and people, including:
 - i. whether and how the highest governance body engages with stakeholders to support these processes;
 - ii. how the highest governance body considers the outcomes of these processes;
- c. describe the role of the highest governance body in reviewing the effectiveness of the organization's processes as described in 2-12-b, and report the frequency of this review.

GUIDANCE

For more information about the role of the highest governance body in overseeing the management of the organization's impacts, see reference [20] in the [Bibliography](#).

Guidance to 2-12-b-i

Requirement 2-12-b-i covers the role of the highest governance body in stakeholder engagement. The organization is also required to report information about stakeholder engagement under other disclosures, such as under the disclosures in [section 5](#) of this Standard.

The organization can describe the frequency of engagement between the highest governance body and stakeholders as well as the means of engagement. If stakeholder engagement is delegated, the organization can report to whom it is delegated and how the feedback received is provided to the highest governance body.

سازمان می‌تواند تناوب تعامل بین بالاترین نهاد حاکمیتی و ذینفعان و همچنین روش‌های تعامل را شرح دهد. اگر تعامل با ذینفعان واگذار شده باشد، سازمان می‌تواند گزارشی دهد که این وظیفه به چه کسی واگذار شده و چگونه بازخورد دریافت‌شده به بالاترین نهاد حاکمیتی ارائه می‌شود.

Disclosure 2-13 Delegation of responsibility for managing impacts

REQUIREMENTS

The organization shall:

- a. describe how the highest governance body delegates responsibility for managing the organization's impacts on the economy, environment, and people, including:
 - i. whether it has appointed any senior executives with responsibility for the management of impacts;
 - ii. whether it has delegated responsibility for the management of impacts to other employees;
- b. describe the process and frequency for senior executives or other employees to report back to the highest governance body on the management of the organization's impacts on the economy, environment, and people.

فرآیند و تناوب گزارش‌دهی مدیران ارشد یا سایر کارکنان به بالاترین نهاد حاکمیتی در مورد مدیریت تأثیرات سازمان بر اقتصاد، محیط‌زیست و افراد را شرح دهد.

Disclosure 2-14 Role of the highest governance body in sustainability reporting

REQUIREMENTS	The organization shall: - report whether the highest governance body is responsible for reviewing and approving the reported information, including the organization's material topics, and if so, describe the process for reviewing and approving the information; - if the highest governance body is not responsible for reviewing and approving the reported information, including the organization's material topics, explain the reason for this.
GUIDANCE	The organization can report whether the highest governance body has established a sustainability reporting committee to support the highest governance body's review and approval process. The organization can also report whether the highest governance body reviews the adequacy of the organization's internal controls to strengthen the integrity and credibility of the organization's sustainability reporting (see section 5.2 in GRI 1: Foundation 2021 for more information). The involvement of the highest governance body and senior executives in developing the organization's policy and practice for seeking external assurance is reported under Disclosure 2-5 in this Standard.

سازمان را ملزم می‌کند تا گزارش دهد که آیا بالاترین نهاد حاکمیتی مسئول بررسی و تصویب اطلاعات گزارش‌شده، از جمله موضوعات بااهمیت سازمان، است یا خیر، و در صورت مثبت بودن، فرآیند بررسی و تصویب را شرح دهد؛ در غیر این صورت، دلیل عدم مسئولیت را توضیح دهد.

Disclosure 2-15 Conflicts of interest

REQUIREMENTS

The organization shall:

- a. describe the processes for the highest governance body to ensure that conflicts of interest are prevented and mitigated;
- b. report whether conflicts of interest are disclosed to stakeholders, including, at a minimum, conflicts of interest relating to:
 - i. cross-board membership;
 - ii. cross-shareholding with suppliers and other stakeholders;
 - iii. existence of controlling shareholders;
 - iv. related parties, their relationships, transactions, and outstanding balances.

عضویت متقاطع در هیئت‌ها؛
سهامداری متقاطع با تأمین‌کنندگان و
سایر ذینفعان؛
وجود سهامداران کنترلی؛
اشخاص مرتبط، روابط آن‌ها،
معاملات و مانده‌های برجسته.

GUIDANCE

See reference [20] in the [Bibliography](#).

Guidance to 2-15-b-iii

The organization should use the definition of controlling shareholder applied in the organization's consolidated financial statements or equivalent documents.

Disclosure 2-16 Communication of critical concerns

REQUIREMENTS

The organization shall:

- a. describe whether and how critical concerns are communicated to the highest governance body;
- b. report the **total number** and the nature of critical concerns that were communicated to the highest governance body during the reporting period.

GUIDANCE

Critical concerns include concerns about the organization's potential and actual negative impacts on stakeholders raised through grievance mechanisms and other processes. They also include concerns identified through other mechanisms about the organization's business conduct in its operations and its business relationships. See guidance to [Disclosure 2-25](#) and [Disclosure 2-26](#) in this Standard for more information.

نگرانی‌های بحرانی شامل نگرانی‌هایی درباره تأثیرات منفی بالقوه و واقعی سازمان بر ذینفعان است که از طریق مکانیزم‌های رسیدگی به شکایات و سایر فرآیندها مطرح می‌شوند. همچنین شامل نگرانی‌هایی است که از طریق مکانیزم‌های دیگر درباره رفتار تجاری سازمان در عملیات و روابط تجاری آن شناسایی شده‌اند.

Disclosure 2-17 Collective knowledge of the highest governance body

REQUIREMENTS

The organization shall:

- a. report measures taken to advance the collective knowledge, skills, and experience of the highest governance body on sustainable development.

سازمان را ملزم می‌کند تا اقداماتی که برای ارتقای دانش، مهارت‌ها و تجربه جمعی بالاترین نهاد حاکمیتی در زمینه توسعه پایدار انجام شده است را گزارش دهد.

Disclosure 2-18 Evaluation of the performance of the highest governance body

REQUIREMENTS

The organization shall:

- a. describe the **processes for evaluating the performance** of the highest governance body in overseeing the management of the organization's impacts on the economy, environment, and people;
- b. report whether the evaluations are **independent or not**, and the **frequency** of the evaluations;
- c. **describe actions taken** in response to the evaluations, including changes to the composition of the highest governance body and organizational practices.

اقداماتی که در پاسخ به ارزیابی‌ها انجام شده‌اند، از جمله تغییرات در ترکیب بالاترین نهاد حاکمیتی و رویه‌های سازمانی را شرح دهد.

Disclosure 2-19 Remuneration policies

REQUIREMENTS

The organization shall:

- a. describe the **remuneration policies** for members of the **highest governance body** and **senior executives**, including:

- i. fixed pay and variable pay;
- ii. sign-on bonuses or recruitment incentive payments;
- iii. termination payments;
- iv. clawbacks;
- v. retirement benefits;

حقوق ثابت و متغیر
پاداش‌های ورودی یا پرداخت‌های تشویقی استخدام
پرداخت‌های پایان خدمت
بازپرداخت‌ها (Clawbacks)
مزایای بازنشستگی

- b. describe how the remuneration policies for members of the highest governance body and senior executives relate to their **objectives and performance** in relation to the management of the organization's **impacts** on the economy, environment, and people.

GUIDANCE

Guidance to 2-19-a-i

Fixed pay and variable pay can include performance-based pay, equity-based pay, bonuses, and deferred and vested shares.

If the organization uses performance-based pay, it should describe how remuneration for senior executives is designed to reward long-term performance.

Guidance to 2-19-a-iii

Termination payments are all payments and benefits given to a departing member of the highest governance body or senior executive whose appointment is terminated. Termination payments extend beyond monetary payments, from transferring property to automatic or accelerated vesting of incentives.

If the organization provides termination payments, it should explain whether:

- notice periods for highest governance body members and senior executives are different from those for other employees;
- termination payments for highest governance body members and senior executives are different from those for other employees;
- departing highest governance body members and senior executives receive payments other than those related to the notice period;
- any mitigation clauses are included in the termination arrangements.

Guidance to 2-19-a-iv

Clawbacks are repayments of previously received compensation that a highest governance body member or senior executive is required to make to their employer if certain conditions of employment or goals are not met.

Guidance to 2-19-a-v

The organization should report the differences between the retirement benefit schemes and the contribution rates for the highest governance body members, senior executives, and all other employees.

فرآیند تعیین پاداش

Disclosure 2-20 Process to determine remuneration

REQUIREMENTS

The organization shall:

- a. describe the process for designing its remuneration policies and for determining remuneration, including:
 - i. whether independent highest governance body members or an independent remuneration committee oversees the process for determining remuneration;
 - ii. how the views of stakeholders (including shareholders) regarding remuneration are sought and taken into consideration;
 - iii. whether remuneration consultants are involved in determining remuneration and, if so, whether they are independent of the organization, its highest governance body and senior executives;
- b. report the results of votes of stakeholders (including shareholders) on remuneration policies and proposals, if applicable.

GUIDANCE

Remuneration policies are established to ensure that the remuneration arrangements help recruit, motivate, and retain the highest governance body members, senior executives, and other employees. Remuneration policies further support the organization's strategy and contribution to sustainable development and align with stakeholders' interests.

سیاست‌های پاداش به منظور اطمینان از اینکه ترتیبات پاداش به جذب، انگیزه‌بخشی و حفظ اعضای بالاترین نهاد حاکمیتی، مدیران ارشد و سایر کارکنان کمک می‌کند، ایجاد می‌شوند. سیاست‌های پاداش همچنین از استراتژی سازمان و مشارکت آن در توسعه پایدار حمایت می‌کنند و با منافع ذینفعان هم‌راستا هستند.

سازمان را ملزم می‌کند تا فرآیند طراحی سیاست‌های پاداش و تعیین پاداش را شرح دهد، شامل نقش اعضای مستقل بالاترین نهاد حاکمیتی یا کمیته پاداش مستقل، نحوه در نظر گرفتن دیدگاه‌های ذینفعان (از جمله سهامداران)، مشارکت مشاوران پاداش و استقلال آن‌ها، و نتایج رأی‌گیری ذینفعان در مورد سیاست‌ها و پیشنهادهای پاداش (در صورت وجود) را گزارش دهد.

Disclosure 2-21 Annual total compensation ratio

در این متن به کل مبالغ و مزایایی Compensation اشاره دارد که یک فرد (مثلاً بالاترین فرد پردرآمد یا کارکنان) در طول یک سال بابت کار یا خدماتش دریافت می‌کند.

REQUIREMENTS

The organization shall:

- report the ratio of the annual total compensation for the organization's highest-paid individual to the median annual total compensation for all employees (excluding the highest-paid individual);
- report the ratio of the percentage increase in annual total compensation for the organization's highest-paid individual to the median percentage increase in annual total compensation for all employees (excluding the highest-paid individual);
- report contextual information necessary to understand the data and how the data has been compiled.

اطلاعات زمینه‌ای لازم برای درک داده‌ها و نحوه گردآوری آن‌ها را گزارش دهد

نسبت کل جبران سالانه بالاترین فرد پردرآمد سازمان به میانه کل جبران سالانه همه کارکنان (به‌جز بالاترین فرد پردرآمد) را گزارش دهد

نسبت افزایش درصد کل جبران سالانه بالاترین فرد پردرآمد به میانه افزایش درصد کل جبران سالانه همه کارکنان (به‌جز بالاترین فرد پردرآمد) را گزارش دهد

GUIDANCE

Guidance to 2-21-a and 2-21-b

This disclosure covers all employees as reported under [Disclosure 2-7](#) in this Standard.

Annual total compensation includes salary, bonus, stock awards, option awards, non-equity incentive plan compensation, change in pension value, and nonqualified deferred compensation earnings provided over the course of a year. When calculating the ratio, the organization should, depending on the organization's remuneration policies and availability of data, consider all of the following:

- Base salary, which is the sum of guaranteed, short-term, and non-variable cash compensation.
- Total cash compensation, which is the sum of the base salary and cash allowances, bonuses, commissions, cash profit-sharing, and other forms of variable cash payments.
- Direct compensation, which is the sum of total cash compensation and total fair value of all annual long-term incentives (e.g., stock option awards, restricted stock shares or units, performance stock shares or units, phantom stock shares, stock appreciation rights, and long-term cash awards).

The annual total compensation ratio can be calculated using the following formula:

$$\frac{\text{Annual total compensation for the organization's highest paid-individual}}{\text{Median annual total compensation for all of the organization's employees excluding the highest-paid individual}}$$

The change in the annual total compensation ratio can be calculated using the following formula:

$$\frac{\text{Percentage increase in annual total compensation for the organization's highest-paid individual}}{\text{Median percentage increase in annual total compensation for all of the organization's employees excluding the highest-paid individual}}$$

Guidance to 2-21-c

Quantitative data, such as the annual total compensation ratio, may not be sufficient on its own to understand pay disparity and its drivers. For example, pay ratios can be influenced by the size of the organization (e.g., revenue, number of employees), its sector, its employment strategy (e.g., reliance on outsourced workers or part-time employees, a high degree of automation), or currency volatility.

The difference in pay disparity reported over the years may be the result of a change in the

organization's compensation policy or the level of compensation for its highest-paid individual or employees, a change in calculation methodology (e.g., selection of the median annual total compensation, inclusions or exclusions) or an improvement in data collection processes. For this reason, the organization is required to report contextual information to help information users interpret the data and understand how it has been compiled.

The organization should provide the following contextual information:

- Whether any employees reported under [Disclosure 2-7](#) in this Standard have been excluded.
- Whether full-time equivalent (FTE) pay rates are used for each part-time employee.
- A list of the types of compensation included.
- The title of the highest-paid individual.

سازمان را ملزم می‌کند تا نسبت کل جبران سالانه بالاترین فرد پردرآمد به میانه کل جبران سالانه همه کارکنان (به جز فرد پردرآمد)، نسبت افزایش درصد کل جبران سالانه فرد پردرآمد به میانه افزایش درصد کل جبران سالانه کارکنان، و اطلاعات زمینه‌ای لازم برای درک داده‌ها و نحوه گردآوری آن‌ها را گزارش دهد.

4. Strategy, policies and practices

The disclosures in this section provide information about the organization's sustainable development strategy and its policies and practices for responsible business conduct. The disclosures are based on expectations for businesses contained in authoritative intergovernmental instruments.¹

Expectations for responsible business conduct include complying with laws and regulations, respecting all internationally recognized human rights, including workers' rights, and protecting the environment and public health and safety. The expectations also cover combating bribery, bribe solicitation, extortion, and other forms of corruption; adhering to good tax practices; and conducting due diligence to identify, prevent, mitigate, and account for how the organization addresses its negative impacts on the economy, environment, and people, including impacts on their human rights.

In the disclosures in this section, the organization is required to report information about its overall policies and practices for responsible business conduct, rather than information for specific material topics. [Disclosure 3-3 in GRI 3: Material Topics 2021](#) requires information about how the organization manages each material topic. If the organization has described its policies and practices for a material topic under the disclosures in this section, it can provide a reference to this information under Disclosure 3-3 in *GRI 3* and does not need to repeat the information.

بیانیه استراتژی توسعه پایدار

Disclosure 2-22 Statement on sustainable development strategy

REQUIREMENTS	The organization shall:
	a. report a statement from the <u>highest governance body</u> or most <u>senior executive of the organization</u> about the <u>relevance of sustainable development to the organization and its strategy for contributing to sustainable development</u>.
GUIDANCE	The organization should describe:
	- its short, medium, and long-term vision and strategy to manage its <u>impacts</u> on the economy, environment, and people, including impacts on their <u>human rights</u>, across the organization's activities and <u>business relationships</u>; - how its purpose, business strategy, and business model aim to prevent negative impacts and achieve positive impacts on the economy, environment, and people; - its short and medium-term strategic priorities for contributing to sustainable development, including how the priorities are aligned with authoritative intergovernmental instruments; - the broader trends (e.g., macroeconomic, social, political) affecting the organization and its strategy for contributing to sustainable development; - the key events, achievements, and failures associated with the organization's contribution to sustainable development during the <u>reporting period</u>; - a view of performance against goals and targets related to the organization's <u>material topics</u> during the reporting period; - the organization's main challenges, goals, and targets regarding its contribution to sustainable development for the next year and the coming three to five years.

سازمان را ملزم می‌کند تا بیانیه‌ای از بالاترین نهاد حاکمیتی یا ارشدترین مدیر اجرایی درباره اهمیت توسعه پایدار برای سازمان و استراتژی آن برای مشارکت در توسعه پایدار ارائه دهد.

Disclosure 2-23 Policy commitments

تعهدات سیاستی

REQUIREMENTS

The organization shall:

رفتار مسئولانه تجاری

a. describe its policy commitments for **responsible business conduct**, including:

ایزاهای بین‌المللی معتبر که تعهدات به آن‌ها ارجاع می‌دهند

آیا تعهدات شامل انجام بررسی دقیق (Due Diligence) هستند یا خیر

آیا تعهدات شامل اعمال اصل احتیاط هستند یا خیر

- i. the authoritative intergovernmental instruments that the commitments reference;
- ii. whether the commitments stipulate conducting due diligence;
- iii. whether the commitments stipulate applying the precautionary principle;
- iv. whether the commitments stipulate respecting human rights;

آیا تعهدات شامل احترام به حقوق بشر هستند یا خیر؟

b. describe its specific policy commitment to respect human rights, including:

- i. the internationally recognized human rights that the commitment covers;
- ii. the categories of stakeholders, including at-risk or vulnerable groups, that the organization gives particular attention to in the commitment;

c. provide links to the policy commitments if publicly available, or, if the policy commitments are not publicly available, explain the reason for this;

d. report the level at which each of the policy commitments was approved within the organization, including whether this is the most senior level;

e. report the extent to which the policy commitments apply to the organization's activities and to its business relationships;

f. describe how the policy commitments are communicated to workers, business partners, and other relevant parties.

GUIDANCE

This disclosure covers the organization's policy commitments for responsible business conduct, including the commitment to respect human rights. These commitments can be set out in a stand-alone policy document or be included within one or more other policy documents, such as codes of conduct.

The *Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises* [12], the *OECD Due Diligence Guidance for Responsible Business Conduct* [11], and the *United Nations (UN) Guiding Principles on Business and Human Rights* [14] set out expectations for organizations in relation to these policy commitments.

Guidance to 2-23-a

The organization should report the expectations, values, principles, and norms of behavior set out in the policy commitments.

The organization can also report how the policy commitments were developed, including the internal and external expertise that informed the policy commitments.

Guidance to 2-23-a-i

See the Bibliography for a list of authoritative intergovernmental instruments for responsible business conduct.

The organization can also make a reference to other standards or initiatives that it participates in.

Guidance to 2-23-a-iii

The precautionary principle is set out in Principle 15 of the *UN Rio Declaration on Environment and Development* [18]. It states: 'Where there are threats of serious or irreversible damage, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation.'

The precautionary principle means taking early action to prevent and mitigate potential negative impacts in situations where conclusive scientific understanding or evidence is lacking, but there is sufficient reason to expect serious or irreversible damage.

While the precautionary principle is most often associated with the protection of the environment, it can be applied to other areas, such as health and safety. The organization can describe the areas where it applies the precautionary principle.

The application of the precautionary principle can be reported under [3-3-d-i in GRI 3: Material Topics 2021](#), as part of the organization's actions to prevent or mitigate potential negative impacts for each material topic.

Guidance to 2-23-b-i

Human rights are rights inherent to all human beings and are all interrelated, interdependent, and indivisible.

The internationally recognized human rights include, at a minimum, the rights set out in the *UN International Bill of Human Rights* [15] and the principles concerning fundamental rights set out in the *International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work* [5]. The *UN International Bill of Human Rights* consists of the *Universal Declaration of Human Rights*, the *International Covenant on Economic, Social and Cultural Rights*, and the *International Covenant on Civil and Political Rights* and its two Optional Protocols.

Other UN instruments elaborate further on the rights of indigenous peoples; women; national or ethnic, religious and linguistic minorities; children; persons with disabilities; and migrant workers and their families. There are also standards of international humanitarian law that apply in situations of armed conflict, such as the International Committee of the Red Cross (ICRC) Geneva Conventions of 1949 [1].²

At the regional level, binding treaties as well as non-binding instruments provide region-specific frameworks for human rights.³

If the policy commitment covers all internationally recognized human rights, a brief statement of this fact is sufficient to comply with the requirement. The organization can also state if the policy commitment references certain rights that require particular attention. For example, an organization can state that its policy commitment covers all internationally recognized human rights, and also references the rights to privacy and freedom of expression in particular because the organization has identified that its activities have an impact on these rights.

If the policy commitment covers only some internationally recognized human rights, the organization is required to state the rights that are covered. It can explain why the policy commitment is limited to these rights.

Guidance to 2-23-b-ii

Categories of stakeholders that the organization gives particular attention to can include consumers, customers, employees and other workers, and local communities. They can also include individuals belonging to groups or populations that are considered to be at risk or vulnerable groups, such as children; human rights defenders; indigenous peoples; migrant workers and their families; national or ethnic, religious and linguistic minorities; persons who might be discriminated against based on their sexual orientation, gender identity, gender expression, or sex characteristics; persons with disabilities; or women.

For example, a bank may give particular attention in its policy commitment to avoid discriminating against specific categories of customers, or a mining organization may give particular attention to avoid infringing on the rights of indigenous peoples.

Guidance to 2-23-d

The most senior level may differ between organizations. For example, the most senior level in an organization could be the highest governance body (e.g., the board) or the most senior executive (e.g., chief executive officer).

The organization can also report the dates of approval and adoption of the policy commitments, and how frequently the commitments are reviewed.

Guidance to 2-23-e

If the policy commitments apply to all of the organization's activities and business relationships equally, a brief statement of this fact is sufficient to comply with the requirement.

If the policy commitments apply to only some of the organization's activities (e.g., they apply only to entities located in certain countries or to certain subsidiaries), the organization should report which activities the commitments apply to. It can also explain why the commitments are limited to these activities.

¹ These instruments include the *International Labour Organization (ILO) Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy* [9]; the *Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises* [12]; the *OECD Due Diligence Guidance for Responsible Business Conduct* [11]; and the *United Nations (UN) Guiding Principles on Business and Human Rights* [14]. These instruments are in turn based on international legal instruments, such as the *United Nations (UN) International Bill of Human Rights* [15] and the ILO conventions.

If the policy commitments apply to only some of the organization's business relationships, the organization should specify the types of business relationships the commitments apply to (e.g., distributors, franchisees, joint ventures, suppliers). It can also explain why the commitments are limited to these business relationships. The organization should also explain whether the business relationships are obligated to abide by the policy commitments or are encouraged (but not obligated) to do so.

Guidance to 2-23-f

The organization can report:

- whether the policy commitments need to be read, agreed to, and regularly signed by all workers, business partners, and other relevant parties, such as governance body members;
- the means through which it communicates the policy commitments (e.g., newsletters, formal or informal meetings, dedicated websites, contractual agreements);
- how it identifies and removes potential barriers to the communication or dissemination of the policy commitments (e.g., by making them accessible and available in relevant languages).

Disclosure 2-24 Embedding policy commitments

REQUIREMENTS

The organization shall:

- a. describe how it embeds each of its policy commitments for responsible business conduct throughout its activities and business relationships, including:
 - i. how it allocates responsibility to implement the commitments across different levels within the organization;
 - ii. how it integrates the commitments into organizational strategies, operational policies, and operational procedures;
 - iii. how it implements its commitments with and through its business relationships;
 - iv. training that the organization provides on implementing the commitments.

GUIDANCE

This disclosure gives insight into how the organization embeds its policy commitments for responsible business conduct, including the commitment to respect human rights, throughout its activities and business relationships. This ensures that people at all levels act responsibly and with awareness of and respect for human rights.

Guidance to 2-24-a-i

Examples of different levels within an organization include the highest governance body, senior executives, and operational levels.

The organization can report:

- the most senior level with oversight of, or accountability for, the implementation of the policy commitments;
- the functions in the organization with day-to-day responsibility for implementing each of the policy commitments (e.g., human resources with the responsibility for implementing the commitment to respect the rights of workers), including:
 - their reporting lines to senior decision-making levels;
 - the reason for allocating the responsibility to them;
- whether responsible business conduct is formally discussed at meetings of the highest governance body or senior executives and, if so, which topics are discussed;
- whether there are other formal or systematic means for discussions about responsible business conduct between different levels or functions in the organization (e.g., a cross-functional working group).

Guidance to 2-24-a-ii

The organization can describe:

- how it aligns the policy commitments with its:
 - broader risk management systems and management policies;
 - economic, environmental, social, and human rights impact assessments, and other due diligence processes;
 - policies and procedures that set financial and other performance incentives for management or workers;
- how it applies the policy commitments when making decisions, such as about its sourcing and operating locations;
- the systems (e.g., internal audit) it uses to monitor compliance with the policy commitments throughout its activities (across functions and geographic locations) and throughout its business relationships.

Guidance to 2-24-a-iii

The organization can describe:

- its procurement or investment policies and practices, and its engagement with those with which it has business relationships, including:
 - whether and how it applies pre-qualification processes, bidding criteria, or screening criteria consistent with the expectations stipulated in the policy commitments for responsible business conduct;
 - whether and how it considers the policy commitments in contracting or investment agreements, or in specific policies or codes of conduct for suppliers;
- whether and how it considers the policy commitments in the process of determining whether to initiate, continue, or terminate a business relationship;

2 See the Office of the United Nations High Commissioner for Human Rights' non-exhaustive list of universal human rights instruments, <https://www.ohchr.org/EN/ProfessionalInterest/Pages/UniversalHumanRightsInstruments.aspx>, accessed on 7 May 2021.

3 See the Office of the United Nations High Commissioner for Human Rights' list of regional human rights treaties, <https://www.ohchr.org/en/issues/escr/pages/regionalhrtreaties.aspx>, accessed on 7 May 2021.

- implement the policy commitments (e.g., capacity building, peer sharing);
- incentives that it offers to business partners and other parties to implement the policy commitments (e.g., price premiums, increased orders, long-term contracts).

Guidance to 2-24-a-iv

The organization can report:

- the content of the training;
- to whom the training is provided, and whether it is mandatory;
- the form (e.g., in-person, online) and frequency of the training;
- examples of how the organization has determined that the training is effective.

The organization can report whether the training covers how to implement the policy commitments in general or in specific situations (e.g., ensuring the commitment to privacy when handling customers' personal data, ensuring the policy commitments are considered in procurement practices).

The organization can specify if training is provided to those with day-to-day responsibility for and those with oversight of or accountability for implementing the policy commitments. The organization can also specify if training is provided to those with which it has business relationships (e.g., distributors, franchisees, joint ventures, suppliers). The organization can report the number or percentage of workers, business partners, and other parties that have been trained during the reporting period.

Disclosure 2-25 Processes to remediate negative impacts

REQUIREMENTS

The organization shall:

- a. describe its commitments to provide for or cooperate in the remediation of negative impacts that the organization identifies it has caused or contributed to;
- b. describe its approach to identify and address grievances, including the grievance mechanisms that the organization has established or participates in;
- c. describe other processes by which the organization provides for or cooperates in the remediation of negative impacts that it identifies it has caused or contributed to;
- d. describe how the stakeholders who are the intended users of the grievance mechanisms are involved in the design, review, operation, and improvement of these mechanisms;
- e. describe how the organization tracks the effectiveness of the grievance mechanisms and other remediation processes, and report examples of their effectiveness, including stakeholder feedback.

GUIDANCE

This disclosure covers grievance mechanisms that the organization has established or participates in. Grievance mechanisms enable stakeholders to raise concerns about, and seek remedy for, the organization's potential and actual negative impacts on them. This includes impacts on their human rights. This disclosure also covers other processes by which the organization provides for or cooperates in the remediation of negative impacts that it identifies it has caused or contributed to.

The *United Nations (UN) Guiding Principles on Business and Human Rights* [14] and the *Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises* [12] set out expectations for organizations to provide for or cooperate in the remediation, through legitimate processes, of negative impacts that they identify they have caused or contributed to. The organization is not responsible for the remediation of negative impacts directly linked to its operations, products, or services by its business relationships, where the organization has not contributed to the impacts. It can, however, play a role in the remediation. See [Box 3 in GRI 3: Material Topics 2021](#) for more information on causing, contributing, or being directly linked to negative impacts.

These instruments also set out expectations for organizations to establish or participate in effective operational-level grievance mechanisms.

Grievance mechanisms are distinct from whistleblowing mechanisms. Whistleblowing mechanisms enable individuals to raise concerns about wrongdoing or breaches of the law in the organization's operations or business relationships, regardless of whether the individuals themselves are harmed or not. Whistleblowing mechanisms are reported under [Disclosure 2-26](#) in this Standard.

This disclosure covers the operation of grievance mechanisms and other remediation processes. The actions taken to provide for or cooperate in the remediation of actual negative impacts for material topics are reported under [3-3-d-ii in GRI 3](#).

The disclosure is only relevant to environmental remediation processes (e.g., processes to remove contaminants from soil) when these are connected to impacts on stakeholders or grievances raised by stakeholders. However, the remedy provided to stakeholders through the mechanisms and processes covered by this disclosure may involve environmental remediation. The use of environmental remediation processes can be reported under [3-3-d-ii in GRI 3](#).

Guidance to 2-25-b

Grievance mechanisms refer to any routinized, state-based or non-state-based, judicial or non-judicial processes through which stakeholders can raise grievances and seek remedy.

Examples of state-based judicial and non-judicial grievance mechanisms include courts (for both criminal and civil actions), labor tribunals, national human rights institutions, National Contact Points under the *OECD Guidelines for Multinational Enterprises*, ombudsperson offices, consumer protection agencies, regulatory oversight bodies, and government-run complaints offices.

Non-state-based grievance mechanisms include those administered by the organization, either alone or together with stakeholders, such as operational-level grievance mechanisms and collective bargaining, including the mechanisms established by collective bargaining. They also include mechanisms administered by industry associations, international organizations, civil society organizations, or multi-stakeholder groups.

Operational-level grievance mechanisms are administered by the organization either alone or in collaboration with other parties and are directly accessible by the organization's stakeholders. They allow for grievances to be identified and addressed early and directly, thereby preventing both harm and grievances from escalating. They also provide important feedback on the effectiveness of the organization's due diligence from those who are directly affected.

The organization can describe:

- the intended purpose and users of the mechanisms (i.e., whether they are intended for a particular stakeholder category, topic, or region) and whether they enable users to raise human rights-related concerns. For example, the organization can explain that it has established a mechanism for community members to raise complaints about resettlement, as well as a separate hotline for workers to raise concerns about issues affecting their rights, such as health and safety conditions;
- how the mechanisms operate and who administers them (the organization or another party);
- whether operational-level grievance mechanisms are administered at the organizational level or whether they are administered at a lower level (at the site or project level) and, in such a case, how information from these mechanisms is centralized;
- how the mechanisms have been designed and on which principles and guidelines they are based, including whether they are designed to meet the effectiveness criteria set out in *UN Guiding Principle 31* [14];
- the process through which grievances are investigated;
- whether grievances are communicated to the highest governance body;
- whether grievances are treated confidentially;
- whether the mechanisms can be used by stakeholders anonymously through representation by a third party;
- whether the organization requires or provides incentives for the creation or improvement of operational-level grievance mechanisms in workplaces of suppliers;
- whether the organization provides a back-up process for workplaces of suppliers that do not have operational-level grievance mechanisms or where the existing grievance mechanisms in those workplaces result in unresolved issues.

Guidance to 2-25-c

Requirement 2-25-c covers remediation processes other than grievance mechanisms. Such processes lead to the remediation of an impact without mechanisms for filing a formal complaint.

Examples include instances where the organization takes action to remediate an actual impact evidenced in an impact assessment or a report published by a civil society organization.

Guidance to 2-25-d

The organization can describe, for example, how it engages with stakeholders who are the intended users of the grievance mechanisms, to understand how they want to access the mechanisms to raise concerns, and their expectations about how the mechanisms will operate.

Guidance to 2-25-e

According to *UN Guiding Principle 31* [14], effective grievance mechanisms are legitimate, accessible, predictable, equitable, transparent, rights-compatible, and a source of continuous learning. In addition to these criteria, effective operational-level grievance mechanisms are also based on engagement and dialogue. It can be more difficult for the organization to assess the effectiveness of grievance mechanisms that it participates in compared to those it has established itself.

The organization can report:

- whether and how the intended users are informed about the grievance mechanisms and remediation processes;
- whether and how the intended users are trained to use the grievance mechanisms and remediation processes;

- the accessibility of the grievance mechanisms and remediation processes, such as the number of hours per day or days per week they are accessible, and their availability in different languages;
- how the organization seeks to ensure it respects users' human rights and protects them against reprisals (i.e., non-retaliation for raising complaints or concerns);
- how satisfied users are with the grievance mechanisms and remediation processes, and with the resulting outcomes, as well as how the organization assesses user satisfaction;
- the number and types of grievances filed during the reporting period, and the percentage of grievances that were addressed and resolved, including the percentage that were resolved through remediation;
- the number of grievances filed during the reporting period that are repeated or recurring;
- changes made to the grievance mechanisms and remediation processes in response to lessons learned about their effectiveness.

Quantitative data, such as the number of grievances, is unlikely to be sufficient on its own. For example, a low number of grievances could indicate that few incidents have occurred, but it could also signal that their intended users do not trust the mechanisms. For this reason, contextual information should be provided to help information users interpret the data.

Disclosure 2-26 Mechanisms for seeking advice and raising concerns

REQUIREMENTS

The organization shall:

- a. describe the mechanisms for individuals to:
 - i. seek advice on implementing the organization's policies and practices for responsible business conduct;
 - ii. raise concerns about the organization's business conduct.

GUIDANCE

This disclosure covers the organization's mechanisms for individuals to seek advice and raise concerns about responsible business conduct in the organization's operations and business relationships. Examples of these mechanisms include confidential interviews during site visits, escalation processes (to raise issues through management levels), hotlines, mechanisms to report non-compliance with laws and regulations, and whistleblowing mechanisms.

These mechanisms enable individuals to raise concerns about wrongdoing or breaches of the law in the organization's operations or business relationships, regardless of whether the individuals themselves are harmed or not. They are distinct from grievance mechanisms, which enable stakeholders to raise concerns about, and seek remedy / remediation for, the organization's potential and actual negative impacts on them. Grievance mechanisms are reported under [Disclosure 2-25](#) in this Standard.

If the organization's grievance mechanisms and its mechanisms for seeking advice and raising concerns about responsible business conduct operate in a similar way, the organization can provide a single description of how these mechanisms operate and explain which mechanisms the description covers.

The organization can report:

- who the intended users of the mechanisms are;
- how the mechanisms operate and which level or function in the organization is assigned responsibility for them;
- whether the mechanisms are operated independently of the organization (e.g., by a third party);
- the process through which concerns are investigated;
- whether requests for advice and concerns raised are treated confidentially;
- whether the mechanisms can be used anonymously.

Additionally, the organization can report information about the effectiveness of the mechanisms, including:

- whether and how the intended users are informed about the mechanisms and trained on how to use them;
- the accessibility of the mechanisms, such as the number of hours per day or days per week they are available, and their availability in different languages;
- how the organization seeks to ensure it respects users' human rights and protects them against reprisals (i.e., non-retaliation for raising concerns);
- how satisfied users are with the mechanisms and with the resulting outcomes;
- the number and types of requests for advice received during the reporting period, and the percentage of requests that were answered;
- the number and types of concerns raised during the reporting period, and the percentage of concerns that were addressed and resolved or found to be unsubstantiated.

Disclosure 2-27 Compliance with laws and regulations

REQUIREMENTS

The organization shall:

- a. report the total number of significant instances of non-compliance with laws and regulations during the reporting period, and a breakdown of this total by:
 - i. instances for which fines were incurred;
 - ii. instances for which non-monetary sanctions were incurred;
- b. report the total number and the monetary value of fines for instances of non-compliance with laws and regulations that were paid during the reporting period, and a breakdown of this total by:
 - i. fines for instances of non-compliance with laws and regulations that occurred in the current reporting period;
 - ii. fines for instances of non-compliance with laws and regulations that occurred in previous reporting periods;
- c. describe the significant instances of non-compliance;
- d. describe how it has determined significant instances of non-compliance.

GUIDANCE

This disclosure addresses non-compliance, or failure to comply with, laws and regulations that apply to the organization.

Non-compliance with laws and regulations can give insight into the ability of management to ensure that the organization conforms to certain performance parameters.

Laws and regulations can be issued by various bodies, including local, regional, and national governments; regulatory authorities; and public agencies.

Laws and regulations include:

- international declarations, conventions, and treaties;
- national, subnational, regional, and local regulations;
- binding voluntary agreements made with regulatory authorities and developed as a substitute for implementing a new regulation;
- voluntary agreements (or covenants), if the organization directly joins the agreement, or if public agencies make the agreement applicable to organizations in their territory through legislation or regulation.

This disclosure includes significant instances of non-compliance that resulted in administrative or judicial sanctions and fines that are being appealed during the reporting period.

Non-monetary sanctions can include restrictions imposed by governments, regulatory authorities, or public agencies on the organization's activities or operations, such as withdrawal of trading licenses or licenses to operate in highly regulated industries. They can also include directives to cease or remediate an unlawful activity.

The organization can use information about fines that have been reported in its audited consolidated financial statements or in the financial information filed on public record, including fines that are being appealed and which may appear as balance sheet reserves in the financial statements.

If there were no significant instances of non-compliance with laws and regulations or no fines were paid during the reporting period, a brief statement of this fact is sufficient to comply with the disclosure.

Guidance to 2-27-c

The description of significant instances of non-compliance can include the geographic location where the instance occurred, and the matter to which the instance relates, such as a tax fraud or a spill. The organization is required to report sufficient information for information users to understand the type and the context of significant instances of non-compliance.

The organization can also explain whether the significant instances are repeated or recurring.

Guidance to 2-27-d

When determining the significant instances of non-compliance, the organization can assess:

- the severity of the impact resulting from the instance;
- external benchmarks used in its sector to determine significant instances of non-compliance.

Disclosure 2-28 Membership associations

REQUIREMENTS

The organization shall:

- a. report industry associations, other membership associations, and national or international advocacy organizations in which it participates in a significant role.**

GUIDANCE

The organization may have a significant role in an association or advocacy organization when it holds a position in the governance body, participates in projects or committees, or provides substantive funding beyond routine membership dues. The role may also be significant when the organization views its membership as strategic to influencing the mission or objective of the association that is critical to the organization's own activities.

5. Stakeholder engagement

The disclosures in this section provide information about the organization's stakeholder engagement practices, including how it engages in collective bargaining with employees.

Disclosure 2-29 Approach to stakeholder engagement

REQUIREMENTS

The organization shall:

- a. describe its approach to engaging with stakeholders, including:
 - i. the categories of stakeholders it engages with, and how they are identified;
 - ii. the purpose of the stakeholder engagement;
 - iii. how the organization seeks to ensure meaningful engagement with stakeholders.

GUIDANCE

Stakeholders are individuals or groups that have interests that are affected or could be affected by the organization's activities [11]. For more information on stakeholders, see [section 2.4 in GRI 1: Foundation 2021](#).

This disclosure covers stakeholder engagement undertaken by the organization as part of its ongoing activities, rather than specifically for the purpose of sustainability reporting.

Guidance to 2-29-a-i

Common categories of stakeholders for organizations are business partners, civil society organizations, consumers, customers, employees and other workers, governments, local communities, non-governmental organizations, shareholders and other investors, suppliers, trade unions, and vulnerable groups.

The organization can explain how it determines which categories of stakeholders to engage with and which categories not to engage with.

Guidance to 2-29-a-ii

The purpose of stakeholder engagement can be, for example, to identify actual and potential impacts or to determine prevention and mitigation responses to potential negative impacts. In some cases, stakeholder engagement is a right in and of itself, such as the right of workers to form or join trade unions or their right to bargain collectively.

The organization can also report:

- the type of stakeholder engagement (e.g., participation, consultation, information) and its frequency (e.g., ongoing, quarterly, annually);
- when it engages directly with stakeholders and when it engages with credible stakeholder representatives or proxy organizations, or other credible independent expert resources, and why;
- whether stakeholder engagement activities take place at the organizational level or at a lower level, such as at the site or project level, and in the latter case, how information from stakeholder engagement activities is centralized;
- the resources (e.g., financial or human resources) allocated to stakeholder engagement.

Further information on stakeholder engagement undertaken for specific activities is reported under other disclosures. For example, the organization must report on stakeholder engagement undertaken to determine and manage material topics under [3-1-b](#) and [3-3-f](#) in *GRI 3: Material Topics 2021*.

Guidance to 2-29-a-iii

Meaningful stakeholder engagement is characterized by two-way communication and depends on the good faith of participants on both sides. It is also responsive and ongoing and includes in many cases engaging with relevant stakeholders before decisions are made. [11]

The organization can report:

- how it takes into account potential barriers to stakeholder engagement (e.g., language and cultural differences, gender and power imbalances, divisions within a community or group);
- how it engages with at-risk or vulnerable groups (e.g., whether it takes specific approaches

and gives special attention to potential barriers);

- how it provides stakeholders with information that is understandable and accessible through appropriate communication channels;
- how stakeholder feedback is recorded and integrated into decision-making, and how stakeholders are informed about the way in which their feedback has influenced decisions;
- how it seeks to respect the human rights of all stakeholders engaged, for example, their rights to privacy, freedom of expression, and peaceful assembly and protest;
- how it works with business partners to engage with stakeholders in a meaningful way, including the expectations it places on business partners to respect the human rights of stakeholders during engagement.

Disclosure 2-30 Collective bargaining agreements

REQUIREMENTS

The organization shall:

- a. report the percentage of total employees covered by collective bargaining agreements;
- b. for employees not covered by collective bargaining agreements, report whether the organization determines their working conditions and terms of employment based on collective bargaining agreements that cover its other employees or based on collective bargaining agreements from other organizations.

GUIDANCE

This disclosure provides insights into how the organization engages in collective bargaining with its employees. Collective bargaining is a fundamental right at work covered in the *International Labour Organization (ILO) Right to Organise and Collective Bargaining Convention* [8].

Collective bargaining refers to negotiations that take place between one or more employers or employers' organizations and one or more workers' organizations (e.g., trade unions). The objective of these negotiations is to reach a collective agreement on working conditions and terms of employment (e.g., wages, working time) and to regulate relations between employers and workers. [3] These negotiations are an important means through which employers' organizations and workers' organizations can improve working conditions and labor relations.

Collective agreements can be made at the level of the organization, at the level of a particular site, at the industry level, and at the national level in countries where this is the practice. Collective agreements can cover specific groups of workers, for example, those performing a specific activity or working at a specific location.

If the organization has a statement or policy commitment on freedom of association and collective bargaining, this is reported under 2-23-b-i in this Standard or 3-3-c in *GRI 3: Material Topics 2021*.

See references [2], [3], [4], [5], [6], [8], [10], [21], [25], and [26] in the *Bibliography*.

Guidance to 2-30-a

The organization is required to report the percentage of its employees whose working conditions and terms of employment are regulated by one or more collective bargaining agreements.

The percentage of employees covered by collective bargaining agreements is calculated using the following formula:

$\frac{\text{Number of employees covered by collective bargaining agreements}}{\text{Total number of employees reported under 2-7-a}} \times 100$

The employees covered by collective bargaining agreements are those employees to whom the organization is obligated to apply the agreement. This means that if none of the employees are covered by a collective bargaining agreement, the percentage reported is zero. An employee covered by more than one collective bargaining agreement only needs to be counted once.

This requirement does not ask for the percentage of employees represented by a works council or belonging to trade unions, which can be different. The percentage of employees covered by collective bargaining agreements can be higher than the percentage of unionized employees when the collective bargaining agreements apply to both union and non-union members. Alternatively, the percentage of employees covered by collective bargaining agreements can be lower than the percentage of unionized employees. This may be the case when there are no collective bargaining agreements available or when the collective bargaining agreements do not cover all unionized employees.

The organization can also provide a breakdown of the percentage of employees covered by

collective bargaining agreements by region, or provide comparisons with industry benchmarks.

Guidance to 2-30-b

There may be instances where collective bargaining agreements cover some or none of the organization's employees. However, the working conditions and terms of employment of these employees may be influenced or determined by the organization based on other collective bargaining agreements, such as agreements that cover other employees or agreements from other organizations. If this is the case, the organization is required to report it under 2-30-b. If this is not the case, and the working conditions and terms of employment of these employees are not influenced or determined based on other collective bargaining agreements, a brief statement of this fact is sufficient to comply with this requirement.

Glossary

This glossary provides definitions for terms used in this Standard. The organization is required to apply these definitions when using the GRI Standards.

The definitions included in this glossary may contain terms that are further defined in the complete [GRI Standards Glossary](#). All defined terms are underlined. If a term is not defined in this glossary or in the complete *GRI Standards Glossary*, definitions that are commonly used and understood apply.

business partner

entity with which the organization has some form of direct and formal engagement for the purpose of meeting its business objectives

Source: Shift and Mazars LLP, *UN Guiding Principles Reporting Framework*, 2015; modified

Examples: affiliates, business-to-business customers, clients, first-tier suppliers, franchisees, joint venture partners, investee companies in which the organization has a shareholding position

Note: Business partners do not include subsidiaries and affiliates that the organization controls.

business relationships

relationships that the organization has with business partners, with entities in its value chain including those beyond the first tier, and with any other entities directly linked to its operations, products, or services

Source: United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations "Protect, Respect and Remedy" Framework*, 2011; modified

Note: Examples of other entities directly linked to the organization's operations, products, or services are a non-governmental organization with which the organization delivers support to a local community or state security forces that protect the organization's facilities.

child

person under the age of 15 years, or under the age of completion of compulsory schooling, whichever is higher

Note 1: Exceptions can occur in certain countries where economies and educational facilities are insufficiently developed, and a minimum age of 14 years applies. These countries of exception are specified by the International Labour Organization (ILO) in response to a special application by the country concerned and in consultation with representative organizations of employers and workers.

Note 2: The ILO *Minimum Age Convention*, 1973, (No. 138), refers to both child labor and young workers.

collective bargaining

all negotiations that take place between one or more employers or employers' organizations, on the one hand, and one or more workers' organizations (e.g., trade unions), on the other, for determining working conditions and terms of employment or for regulating relations between employers and workers

Source: International Labour Organization (ILO), *Collective Bargaining Convention*, 1981 (No. 154); modified

conflict of interest

situation where an individual is confronted with choosing between the requirements of their function in the organization and their other personal or professional interests or responsibilities

due diligence

process to identify, prevent, mitigate, and account for how the organization addresses its actual and potential negative impacts

Source: Organisation for Economic Co-operation and Development (OECD), *OECD Guidelines for Multinational Enterprises*, 2011; modified
United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework*, 2011; modified

Note: See [section 2.3 in GRI 1: Foundation 2021](#) for more information on ‘due diligence’.

employee

individual who is in an employment relationship with the organization according to national law or practice

full-time employee

employee whose working hours per week, month, or year are defined according to national law or practice regarding working time

governance body

formalized group of individuals responsible for the strategic guidance of the organization, the effective monitoring of management, and the accountability of management to the broader organization and its stakeholders

grievance

perceived injustice evoking an individual’s or a group’s sense of entitlement, which may be based on law, contract, explicit or implicit promises, customary practice, or general notions of fairness of aggrieved communities

Source: United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework*, 2011

grievance mechanism

routinized process through which grievances can be raised and remedy can be sought

Source: United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework*, 2011; modified

Note: See [Guidance to Disclosure 2-25 in GRI 2: General Disclosures 2021](#) for more information on ‘grievance mechanism’.

highest governance body

governance body with the highest authority in the organization

Note: In some jurisdictions, governance systems consist of two tiers, where supervision and management are separated or where local law provides for a supervisory board drawn from non-executives to oversee an executive management board. In such cases, both tiers are included under the definition of highest governance body.

human rights

rights inherent to all human beings, which include, at a minimum, the rights set out in the *United Nations (UN) International Bill of Human Rights* and the principles concerning fundamental rights set out in the *International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work*

Source: United Nations (UN), *Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework*, 2011; modified

Note: See [Guidance to 2-23-b-i in GRI 2: General Disclosures 2021](#) for more information on ‘human rights’.

impact

effect the organization has or could have on the economy, environment, and people, including on their human rights, which in turn can indicate its contribution (negative or positive) to sustainable development

Note 1: Impacts can be actual or potential, negative or positive, short-term or long-term, intended or unintended, and reversible or irreversible.

Note 2: See [section 2.1 in GRI 1: Foundation 2021](#) for more information on 'impact'.

Indigenous Peoples

Indigenous Peoples are generally identified as:

- tribal peoples in independent countries whose social, cultural and economic conditions distinguish them from other sections of the national community, and whose status is regulated wholly or partially by their own customs or traditions or by special laws or regulations;
- peoples in independent countries who are regarded as indigenous on account of their descent from the populations which inhabited the country, or a geographical region to which the country belongs, at the time of conquest or colonization or the establishment of present state boundaries and who, irrespective of their legal status, retain some or all of their own social, economic, cultural and political institutions.

Source: International Labour Organization (ILO), *Indigenous and Tribal Peoples Convention*, 1989 (No. 169)

local community

individuals or groups of individuals living or working in areas that are affected or that could be affected by the organization's activities

Note: The local community can range from those living adjacent to the organization's operations to those living at a distance.

material topics

topics that represent the organization's most significant impacts on the economy, environment, and people, including impacts on their human rights

Note: See [section 2.2 in GRI 1: Foundation 2021](#) and [section 1 in GRI 3: Material Topics 2021](#) for more information on 'material topics'.

mitigation

action(s) taken to reduce the extent of a negative impact

Source: United Nations (UN), *The Corporate Responsibility to Respect Human Rights: An Interpretive Guide*, 2012; modified

Note: The mitigation of an actual negative impact refers to actions taken to reduce the severity of the negative impact that has occurred, with any residual impact needing remediation. The mitigation of a potential negative impact refers to actions taken to reduce the likelihood of the negative impact occurring.

non-guaranteed hours employee

employee who is not guaranteed a minimum or fixed number of working hours per day, week, or month, but who may need to make themselves available for work as required

Source: ShareAction, *Workforce Disclosure Initiative Survey Guidance Document*, 2020; modified

Examples: casual employees, employees with zero-hour contracts, on-call employees

part-time employee

employee whose working hours per week, month, or year are less than the number of working hours for full-time employees

permanent employee

employee with a contract for an indeterminate period (i.e., indefinite contract) for full-time or part-time work

remedy / remediation

means to counteract or make good a negative impact or provision of remedy

Source: United Nations (UN), *The Corporate Responsibility to Respect Human Rights: An Interpretive Guide*, 2012; modified

Examples: apologies, financial or non-financial compensation, prevention of harm through injunctions or guarantees of non-repetition, punitive sanctions (whether criminal or administrative, such as fines), restitution, restoration, rehabilitation

reporting period

specific time period covered by the reported information

Examples: fiscal year, calendar year

senior executive

high-ranking member of the management of the organization, such as the Chief Executive Officer (CEO) or an individual reporting directly to the CEO or the highest governance body

severity (of an impact)

The severity of an actual or potential negative impact is determined by its scale (i.e., how grave the impact is), scope (i.e., how widespread the impact is), and irremediable character (how hard it is to counteract or make good the resulting harm).

Source: Organisation for Economic Co-operation and Development (OECD), *OECD Due Diligence Guidance for Responsible Business Conduct*, 2018; modified
United Nations (UN), *The Corporate Responsibility to Respect Human Rights: An Interpretive Guide*, 2012; modified

Note: See [section 1 in GRI 3: Material Topics 2021](#) for more information on 'severity'.

stakeholder

individual or group that has an interest that is affected or could be affected by the organization's activities

Source: Organisation for Economic Co-operation and Development (OECD), *OECD Due Diligence Guidance for Responsible Business Conduct*, 2018; modified

Examples: business partners, civil society organizations, consumers, customers, employees and other workers, governments, local communities, non-governmental organizations, shareholders and other investors, suppliers, trade unions, vulnerable groups

Note: See [section 2.4 in GRI 1: Foundation 2021](#) for more information on 'stakeholder'.

supplier

entity upstream from the organization (i.e., in the organization's supply chain), which provides a product or service that is used in the development of the organization's own products or services

Examples: brokers, consultants, contractors, distributors, franchisees, home workers, independent contractors, licensees, manufacturers, primary producers, sub-contractors, wholesalers

Note: A supplier can have a direct business relationship with the organization (often referred to as a first-tier supplier) or an indirect business relationship.

supply chain

range of activities carried out by entities upstream from the organization, which provide products or services that are used in the development of the organization's own products or services

sustainable development / sustainability

development that meets the needs of the present without compromising the ability of future generations to meet their own needs

Source: World Commission on Environment and Development, *Our Common Future*, 1987

Note: The terms 'sustainability' and 'sustainable development' are used interchangeably in the GRI Standards.

temporary employee

employee with a contract for a limited period (i.e., fixed term contract) that ends when the specific time period expires, or when the specific task or event that has an attached time estimate is completed (e.g., the end of a project or return of replaced employees)

under-represented social group

group of individuals who are less represented within a subset (e.g., a body or committee, employees of an organization) relative to their numbers in the general population, and who therefore have less opportunity to express their economic, social, or political needs and views

Note 1: Under-represented social groups may include minority groups.

Note 2: The groups included under this definition depend on the organization's operating context and are not uniform for every organization.

value chain

range of activities carried out by the organization, and by entities upstream and downstream from the organization, to bring the organization's products or services from their conception to their end use

Note 1: Entities upstream from the organization (e.g., suppliers) provide products or services that are used in the development of the organization's own products or services. Entities downstream from the organization (e.g., distributors, customers) receive products or services from the organization.

Note 2: The value chain includes the supply chain.

vulnerable group

group of individuals with a specific condition or characteristic (e.g., economic, physical, political, social) that could experience negative impacts as a result of the organization's activities more severely than the general population

Examples: children and youth; elderly persons; ex-combatants; HIV/AIDS-affected households; human rights defenders; Indigenous Peoples; internally displaced persons; migrant workers and their families; national or ethnic, religious and linguistic minorities; persons who might be discriminated against based on their sexual orientation, gender identity, gender expression, or sex characteristics (e.g., lesbian, gay, bisexual, transgender, intersex); persons with disabilities; refugees or returning refugees; women

Note: Vulnerabilities and impacts can differ by gender.

worker

person that performs work for the organization

Examples: employees, agency workers, apprentices, contractors, home workers, interns, self-employed persons, sub-contractors, volunteers, and persons working for organizations other than the reporting organization, such as for suppliers

Note: In the GRI Standards, in some cases, it is specified whether a particular subset of workers is required to be used.

Bibliography

This section lists authoritative intergovernmental instruments and additional references used in developing this Standard, as well as resources that can be consulted by the organization.

Authoritative instruments:
